

目录

1 考点 1:Overview of Risk Management 风险管理概况	4
题号 1 考察: 投资者在风险管理中对意外损失的关注程度及其对风险管理过程的理解。(特别是要理解风险管理是零和游戏)	4
题号 2 考察: 风险管理过程中的识别、分析和管理风险的活动。(风险管理就是去平衡增量收益和增量风险,而不是消除风险)	5
题号 3 考察: 理解风险管理在经济层面上的效果。(风险管理在经济层面上的效果有限,因为它主要涉及风险的转移,而不是消除风险。)	5
题号 4 考察: 理解风险管理与风险承担的区别。(风险管理是控制和缓解风险,风险承担是接受风险以实现潜在收益)	6
题号 5 考察: 理解风险管理过程中存在的问题。(风险管理过程中存在的问题主要是两个方面的。一是难以正确地识别风险,二是难以寻求到有效的风险转移的方法。)	7
题号 6 考察: 理解风险管理在经济层面上的效果。(个别企业的风险管理策略可能对整个经济系统产生显著影响。)	7
题号 7 考察: 理解金融危机期间风险管理失败的原因。(风险管理在整体经济上并不总是有效)	8
2 考点 2: 风险管理基础的十个 block	8
题号 1 考察: 理解风险识别的方法。(风险识别的方法有: 头脑风暴、损失数据分析、场景分析)	9
题号 2 考察: 理解风险管理的风险-收益关系。(风险管理需要在风险和收益之间找到平衡点)	9
题号 3 考察: 理解不同类型风险的基本概念。(预期损失是可以通过历史数据预测的,而意外损失和 Knightian 不确定性都具有不可预测性)	10
题号 4 考察: 理解风险-收益关系的复杂性。(一般情况是风险和收益正相关)	10
题号 5 考察: 对不同类型风险的识别和理解。(违约风险与结算风险别混淆了,同时留意非线性风险)	11
题号 6 考察: 掌握市场风险、信用风险、操作风险、法律风险的基本特征和分类方法。(credit spread widening 是市场风险,不是信用风险)	12
题号 7 考察: 理解尾部风险和结构性变化的关系。(尾部风险是极端事件,结构性变化是系统性风险)	12
题号 8 考察: 掌握操作风险的定义。(抓住内部流程、人员、系统、培训这些字眼)	13
题号 9 考察: 掌握流动性风险的定义。(流动性风险分为融资流动性风险和交易流动性风险)	14
题号 10 考察: 掌握各类别风险的定义。(抓住员工操作失误这些字眼)	14
题号 11 考察: 对金融机构各类风险特征的基本认识。(在衍生品交易中,风险敞口会随着市场的变化而变化)	15
题号 12 考察: 对风险管理不同情境的理解。(追求的不是损失最小化)	15
题号 13 考察: 理解 RAROC 的定义。(RAROC 是风险调整后的资本回报率)	16
题号 14 考察: 理解 RAROC 的定义。(RAROC 是风险调整后的资本回报率)	17
题号 15 考察: 理解违约风险敞口的计算。(违约风险敞口是违约后银行可能损失的金额)	17
题号 16 考察: 理解风险管理步骤的顺序。(风险管理步骤的顺序是: 风险识别、风险分析、风险评估、风险管理、风险评价)	18
题号 17 考察: 理解尾部损失的概念。(EVT 是分析尾部损失的有效工具)	19
题号 18 考察: 理解错向风险的概念。(错向风险是交易对手的违约风险与风险敞口呈正相关,在不利市场条件下风险管理难度加大,增加了潜在损失的可能性)	19
题号 19 考察: 理解结构性变化对系统性风险的影响。(结构性变化可能导致尾部风险的积累,增加系统性风险的可能性)	20
题号 20 考察: 声誉风险 (声誉风险作为挤兑风险的触发机制和传导渠道)	21
题号 21 考察: 风险类型 (价格相关性的意外变化属于典型的市场风险)	21
3 考点 3: Risk Management Road Map	21
题号 1 考察: 理解风险偏好框架的特征。(区分行业风险偏好和公司风险偏好)	22
题号 2 考察: 理解风险偏好的表达方式。(可以定性也可以定量)	23
题号 3 考察: 理解风险偏好和风险承受能力的区别。(风险承受能力是公司能够吸收的最大风险,而风险偏好是公司愿意接受的风险水平)	23
题号 4 考察: 风险映射的工具属性和管理属性 (识别和评估风险; 通过净额结算优化资本使用)	24
题号 5 考察: 风险管理策略的实施。(接受、避免、降低、转移)	25
题号 6 考察: 风险管理策略的评估。(成本效益分析)	25
题号 7 考察: 风险偏好和公司治理 (风险偏好由董事会设定)	26
题号 8 考察: 风险管理策略 (弄明白这四个策略的含义)	26

4	考点 4: Hedging	27
题号 1	考察: 对对冲的理解。(了解 MM 理论)	27
题号 2	考察: 对冲方法的劣势和挑战。(需要理解完美市场与零和游戏的关系)	28
题号 3	考察: 理解套期保值的多维度影响。(套期保值对代理问题存在影响)	29
题号 4	考察: 风险对冲的优缺点。(风险管理需要专业技能、专业知识和相关设备, 所以困难)	29
题号 5	考察: 风险对冲的优缺点。(风险对冲可以降低交易费用)	30
题号 6	考察: 动态对冲的挑战。(动态对冲需要持续调整, 而静态对冲方法可能无法应对市场动态变化)	31
题号 7	考察: 风险限额的类型和有效性。(集中度限额需要考虑相关性风险)	31
题号 8	考察: 风险分析方法的局限性。(特定风险限额需要专业知识解读, 跨组合汇总困难, 实施和监控具有挑战性)	32
题号 9	考察: 衍生品在风险管理中的应用。(利率互换可以有效管理利率风险)	32
5	考点 5: Changes in regulations and corporate risk governance.	32
题号 1	考察: 《多德-弗兰克法案》(混淆《多德-弗兰克法案》和《萨班斯-奥克斯利法案》)	33
题号 2	考察: 金融监管 (危机后的监管鼓励集中清算而不是 OTC)	34
题号 3	考察: 巴塞尔协议 (Basel II 与 Basel III 的比较)	34
题号 4	考察: 巴塞尔协议的关键特征 (Basel I 主要关注的是信用风险)	35
题号 5	考察: 公司治理 (SOX 法案的责任分配)	35
题号 6	考察: 多德-弗兰克法案内容 (压力测试需要同时考虑个体和系统性风险)	36
题号 7	考察: CCAR 框架下监管合规 (CCAR 要求银行在计划期间内保持至少 4.5% 的一级资本比率)	36
题号 8	考察: 欧洲银行监管 (EBA 压力测试采用静态方法, 这与 CCAR 的动态方法不同)	37
6	考点 6: Best Practice of Corporate Governance	37
题号 1	考察: 公司治理 (公司治理关注的是对商业实体运营的适当控制, 而不是战略的具体细节。)	38
题号 2	考察: 风险管理框架 (风险管理框架关注的是风险管理策略和流程的建立, 而不是具体的评估方法)	38
题号 3	考察: 对首席风险官职责的理解。(CRO 也有向董事会汇报的职责)	39
题号 4	考察: 对风险偏好和战略规划的理解。(风险偏好是董事会决定的, 而战略规划是管理层决定的)	40
题号 5	考察: 对首席风险官职责的理解。(独立审查是审计委员会的事)	40
题号 6	考察: 对风险治理的理解。(关注经济表现而不是会计表现)	41
题号 7	考察: 对风险管理治理框架的理解。(CRO 需要保持双重汇报路线)	41
题号 8	考察: 对董事会职责的理解。(董事会需要确保风险管理与公司特点相符, 而不是简单套用行业标准)	42
题号 9	考察: 理解不同类型股权激励工具的特点及其对管理层风险管理行为的影响。(OTM 会诱导管理层承担过度风险)	43
题号 10	考察: 理解风险顾问董事的战略定位。(不是执行具体的风险管理工作, 而是提升董事会层面的风险治理质量)	43
题号 11	考察: 掌握金融机构中四个关键部门的具体职责划分: 高级管理层、业务线、风险管理部门、财务与运营部门。(理解记忆各自的职责)	44
题号 12	考察: 理解内部审计在风险管理中的作用。(风险管理活动可以进行评级)	45
题号 13	考察: 理解审计委员会的独立性要求。(独立不代表完全排除管理层参与)	45
题号 14	考察: 理解董事会的全面治理职责。(董事会需要平衡各利益相关者的利益, 确保公司的长期可持续发展)	46
题号 15	考察: 理解风险管理委员会的角色。(为各项商业活动设定明确的风险限制)	47
题号 16	考察: 理解首席风险官的角色。(风险偏好的制定和批准是董事会的职责, 而不是由高级管理层决定)	47
题号 17	考察: 理解风险委员会和审计委员会的职责。(风险委员会负责风险管理制度的建立, 审计委员会负责监督)	48
题号 18	考察: 理解审计委员会的职责。(审计委员会负责确保公司在财务事项上能够尽可能符合最佳实践标准)	49
题号 19	考察: 理解首席风险官和风险咨询董事的职责。(首席风险官负责风险管理策略的制定和执行, 风险咨询董事负责提供风险管理建议)	49
题号 20	考察: 风险治理架构 (政策和方法论的审查是风险管理委员会的职责, 而非 CRO)	50
题号 21	考察: 对审计委员会和风险管理委员会职责的理解。(审计委员会职责需要确保公司遵守非财务事项的最佳实践标准)	51
题号 22	考察: 对于风险限额的理解。(风险限额的设计应确保在正常业务过程中超出限额的概率很低。)	51
7	考点 7: Risk Governance Mechanism	51
题号 1	考察: 理解金融机构两级限额体系。(Tier I 更细, Tier II 更宽)	52
题号 2	考察: 风险偏好声明的核心要素。(需要平衡定量和定性指标, 并为关键风险设定具体阈值)	53

题号 3 考察: 风险偏好陈述书的关键要素: (定性和定量表述、透明度、全面性、审慎性) 53

题号 4 考察: 风险偏好声明的作用与重要性 (风险偏好声明需要包含限制业务单元和组织层面风险承担量的风险容忍
度量。) 54

题号 5 考察: 风险监控 (理解 CRO 在风险限额管理中的角色) 54

题号 6 考察: 理解 Tier 1 和 Tier 2 限额的特点。(Tier 1 更具体严格, Tier 2 更宽泛全面) 55

1 考点 1:Overview of Risk Management 风险管理概况

1. A risk analyst at a financial institution is preparing a report on the key aspects of risk and risk management to present at an upcoming conference. Which of the following statements regarding risk and risk management is correct?

- A. Investors typically care more about positive surprises (unexpected investment gains) than negative outcomes (unexpected investment losses).
- B. Investors focus more on unexpected losses rather than expected losses when managing risk.
- C. Investors pay close attention to potential losses during the risk management process, as risk is related to the magnitude of potential losses.
- D. Investors should not view risk management as a zero-sum game, as the process can eliminate risk over time.

答案:B

解析:

A 选项错误。

- 虽然投资者通常关注意外的投资收益，但在风险管理中，他们更关心的是如何避免意外的投资损失。
- 题外话：心理学研究表明，人们通常对负面信息或坏事的关注程度高于对正面信息的关注。这种现象被称为“负面偏见”(negativity bias)

B 选项正确。

- 投资者在进行风险管理时确实更关注意外损失，而不是预期损失。意外损失可能会对投资组合造成重大影响，因此风险管理的重点是识别和应对这些潜在的意外损失。

C 选项错误。

- 虽然投资者在风险管理过程中关注潜在损失，但风险的大小并不总是与潜在损失的大小成正比。许多潜在损失可能很大，但却是可预测的，因此可以通过风险管理技术进行有效管理。

D 选项错误。

- 投资者可以将风险管理视为零和游戏，因为在这个过程中，风险的转移和承担可能导致某些“获胜”方在其他“失败”方的损失中获利。这意味着在风险管理的框架内，整体风险并没有被消除，而是重新分配给了不同的参与者。
- 尽管风险管理的目标是减少个体的风险暴露，但如果足够多的参与者因过度承担风险而遭受严重损失，可能会导致广泛的经济危机。

考察: 投资者在风险管理中对意外损失的关注程度及其对风险管理过程的理解。(特别是要理解风险管理是零和游戏)

2. A bank’s risk management team is responsible for overseeing the risk management process, which includes identifying, analyzing, and managing risks. Which of the following is a common activity of the risk manager?

- A. The goal is to either avoid or transfer each identified risk, such as using insurance to transfer the risk of property damage.
- B. The goal is to quantify each risk as accurately as possible, for instance, by using statistical models to estimate potential losses from market fluctuations.
- C. The goal is to eliminate every risk to the greatest extent feasible, like implementing strict security measures to prevent data breaches.
- D. The goal is to assist in identifying areas where the firm should consider taking on additional risk, such as investing in emerging markets for higher potential returns.

答案:D

解析:

A 选项错误。

- 虽然避免或转移已识别的风险是风险管理的一部分，但并不是每个风险都能被完全避免或转移。风险管理的目标是有效地识别和应对风险，而不是简单地避免所有风险。

B 选项错误。

- 虽然量化风险是风险管理的重要环节，但风险管理的目标不仅仅是量化风险。风险管理还包括制定应对策略和监控风险的变化。

C 选项错误。

- 消除所有风险在实际操作中几乎是不可能的。风险管理的目标是识别、评估和管理风险，而不是完全消除风险。过于严格的安全措施可能会导致资源浪费和效率降低。

D 选项正确。

- 风险管理的一个重要方面是识别公司可以接受的风险，并在适当的情况下考虑承担额外风险以获取更高的潜在回报。例如，投资新兴市场可能带来更高的收益，但也伴随更大的风险。因此，风险管理者需要在风险和收益之间找到平衡。

考察：风险管理过程中的识别、分析和管理风险的活动。（风险管理就是去平衡增量收益和增量风险，而不是消除风险）

3. In the financial market, risk management is an important tool to ensure market stability and investor confidence. Which of the following statements about risk management is correct?

- A. The effectiveness of risk management depends on the sufficient concentration of risks among economic actors willing and able to bear them.
- B. During a market crisis, risk managers often reduce market volatility by selling risky assets.
- C. Complex derivatives make the entity more financially sound, thereby reducing the complexity of risk management.
- D. The role of risk management at the economic level is limited because it involves the transfer of risk rather than its elimination.

答案:D

解析：

A 选项错误。

- 风险管理的有效性确实依赖于风险的充分分散。通过将风险分散到愿意且有能力承担风险的参与者中，可以降低单个实体的风险暴露，从而减少系统性风险的可能性。

B 选项错误。

- 在市场危机期间，风险管理者通过抛售风险资产来减少市场波动的说法是不正确的。实际上，这种抛售行为可能会加剧市场波动，因为大量抛售会导致市场价格进一步下跌，可能引发市场恐慌和价格急剧下跌的“踩踏效应”。

C 选项错误。

- 复杂的衍生工具可能导致实体的财务状况被夸大，因为这些工具的估值和风险特征在市场不稳定时难以准确评估。这增加了风险管理的复杂性，因为管理者需要对这些工具的潜在风险进行深入理解和监控。

D 选项正确。

- 风险管理在经济层面上的效果有限，因为它主要涉及风险的转移而非消除。通过对冲、保险等金融工具，风险从一个实体转移到另一个实体，但整体经济中的风险总量并未减少。

考察：理解风险管理在经济层面上的效果。（风险管理在经济层面上的效果有限，因为它主要涉及风险的转移，而不是消除风险。）

4. A risk analyst at a fixed-income investment firm is currently evaluating a new project within the company’s portfolio. She needs to distinguish between risk management and risk-taking to make informed decisions. In the context of corporate risk strategy, which statement most accurately describes the difference between risk management and risk-taking?

- A. Risk management involves developing strategies to identify and control risks within the portfolio, while risk-taking involves choosing to accept certain risks after evaluation to pursue potential gains.

- B. Risk management is taking steps to reduce losses after market fluctuations, while risk taking can lead to higher returns and a competitive advantage.
- C. Risk management is the expansion of risk exposure by increasing investment, while risk taking uses various tools and methods such as risk identification, risk assessment, risk monitoring, risk transfer and risk mitigation.
- D. Risk management and risk-taking are the same strategies applied when facing market risks, with no distinction between them.

答案:A

解析:

A 选项正确。

- 风险管理是通过制定策略来识别和控制投资组合中的风险。这种主动的方法确保在风险影响投资组合之前进行评估和缓解。风险承担则是在评估这些风险后，选择接受某些风险以追求潜在收益，平衡潜在回报与风险。

B 选项错误。

- 风险管理不仅仅是在市场波动后采取措施。它包括主动识别和控制风险，以防止损失的发生，而不仅仅是对损失做出反应。

C 选项错误。

- 风险管理不等于通过增加投资来扩大风险敞口。相反，它专注于通过战略规划和分析来控制 and 降低风险。风险承担涉及接受风险以实现潜在收益，而不是简单地使用工具和方法。

D 选项错误。

- 风险管理和风险承担是不同的概念。风险管理专注于控制和缓解风险，而风险承担则涉及接受某些风险以实现潜在收益。

考察: 理解风险管理与风险承担的区别。（风险管理是控制和缓解风险，风险承担是接受风险以实现潜在收益）

5. A junior risk analyst at a global investment bank is preparing a presentation on the key challenges in implementing risk management frameworks. During her research, she identifies several common misconceptions about risk management processes. Which of the following statements about risk management is correct?

- A. Because of the high level of uncertainty, it is difficult for businesses to identify all risks.
- B. Companies can easily identify risks, but it is difficult to find effective ways to transfer risks.
- C. Risk transfer costs are low, so companies focus more on identifying risks.
- D. Options and futures are diverse and low-cost, meeting companies' risk management needs.

答案:A

解析:

A 选项正确。

- 由于风险本身具有高度不确定性，企业在识别所有风险时面临重大挑战。风险可能来自市场波动、法律变化、技术进步等多方面，企业需要进行全面的分析和监控。未能识别的风险可能导致严重的财务损失和战略失败。

B 选项错误。

- 企业在识别风险时通常面临挑战，因为风险的复杂性和多样性使得识别过程并不简单。企业需要投入大量资源和时间来识别潜在风险，并且识别的准确性直接影响到后续的风险管理策略。

C 选项错误。

- 风险转移的成本通常较高，企业在选择风险转移策略时需要考虑成本效益。高昂的转移成本可能使企业在风险管理中面临预算限制。有时，企业可能需要通过风险自留或其他策略来管理风险。

D 选项错误。

- 期权和期货并不是足够多样化或低成本，恰恰相反，期权费成本可能很高，且期货期权品种有限，无法满足所有企业的风险管理需求。

考察: 理解风险管理过程中存在的问题。（风险管理过程中存在的问题主要是两个方面的。一是难以正确地识别风险, 二是难以寻求到有效的风险转移的方法。）

6. A large manufacturing company is reviewing its risk management strategy. Management is discussing how to spread and control risk more effectively to ensure the long-term stability of the business. Which of the following ideas about risk management is true?

- A. Imbalances in risk taking in economies make it easier to spread risk.
- B. Risk management can only reduce or transfer risk, but cannot eliminate the overall risk.
- C. Risk management can prevent the problem of market disturbance, can solve the problem of financial accounting fraud.
- D. The risk management strategies of individual firms do not have an impact on the entire economic system.

答案:B

解析:

A 选项错误。

- 在经济体中，风险承担能力的不均衡并不会让风险分散变得更加容易。相反，这种不均衡可能导致某些参与者承担过多风险，而其他参与者规避风险，从而导致市场不稳定和系统性风险的积累。

B 选项正确。

- 风险管理的核心在于通过各种工具和策略来降低或转移风险，但它无法完全消除风险。风险管理的目标是将风险控制在可接受的范围内，而不是彻底消除风险。

C 选项错误。

- 风险管理无法预防市场扰动或解决财务会计造假问题，因为这些问题通常由复杂且不可预测的因素引发。风险管理的作用在于减轻这些问题的影响，而非完全预防。

D 选项错误。

- 个别企业的风险管理策略可能对整个经济系统产生显著影响，例如在金融危机期间，AIG 大量销售信用违约互换 (CDS) 就是一个例子，当房地产市场崩溃时，大量次贷违约，AIG 需要支付巨额赔付，它对整个金融系统产生了重大影响。

考察: 理解风险管理在经济层面上的效果。（个别企业的风险管理策略可能对整个经济系统产生显著影响。）

7. A risk analyst at a large investment bank is currently exploring the effectiveness of various risk management strategies. The analyst is particularly interested in understanding how different approaches to risk management can mitigate potential losses and enhance financial stability. Which of the following analyses is correct?

- A. The main reason for the failure of risk management during the 2007-2009 financial crisis was that the risks were too broad and had an impact from the whole market at the beginning.
- B. While derivatives can temporarily exaggerate an entity’s financial position, they can also simplify the overall risk profile.
- C. Risk management is always effective at the macroeconomic level, as it redistributes risk among economic participants.
- D. The presence of derivative instruments significantly enhances the capacity to take on high levels of risk and encourages risk managers to follow each other’s actions.

答案:D

解析:

A 选项恰当，不选。

- 在 2007-2009 年金融危机期间，风险管理的失败主要表现在风险过于集中在少数金融机构。这种集中导致了系统性风险的积累，增加了整个金融系统的脆弱性。

B 选项恰当，不选。

- 使用衍生品作为复杂的交易策略虽然可以暂时夸大实体的财务状况，但也使得风险水平更加复杂化。这种复杂性可能导致风险管理者难以全面评估潜在风险。

C 选项错误。

- 风险管理在整体经济上并不总是有效，因为它可能只涉及一方的风险转移和另一方的风险承担。这种转移并不一定能降低整体风险，反而可能导致新的风险集中。

D 选项恰当，不选。

- 衍生金融工具的存在确实极大地促进了承担高水平风险的能力，并且风险管理者往往会追随彼此的行动，尤其是在市场危机期间。这种行为可能加剧市场的不稳定性。
- ” 风险管理者往往会追随彼此的行动” 指的是羊群效应，当市场出现危机时，如果某些大型机构开始抛售资产或调整风险敞口，其他机构往往会跟随。

考察: 理解金融危机期间风险管理失败的原因。（风险管理在整体经济上并不总是有效）

2 考点 2：风险管理基础的十个 block

1. A risk analyst at a fixed-income investment firm is reviewing various risk identification methods to determine which are most effective in uncovering potential risks to the firm’s financial stability. Which of the following statements about risk identification methods is correct?

- A. Brainstorming with key personnel is an overly subjective and relatively inefficient method, especially since participants tend to converge on similar viewpoints after the session.
- B. Analyzing the actual loss data and determining the loss distribution is a qualitative method for risk identification.
- C. Scenario analysis is an effective tool for evaluating potential future events and their impacts on the firm’s risk profile.
- D. Implementation of strict budget control systems is a primary method for identifying potential risks.

答案:C

解析:

A 选项错误。

- 头脑风暴并非主观且低效的方法。相反，它是一种有效的风险识别工具，因为能够汇集不同部门和层级的专业知识和经验，通过开放式讨论可以激发创新思维，发现潜在风险，参与者的多样性恰恰有助于避免思维定式，提供不同视角。

B 选项错误。

- 分析实际损失数据和确定损失分布是定量方法，而非定性方法。这种方法使用统计工具分析历史损失数据，通过数学模型建立损失分布，提供可量化的风险评估结果。

C 选项正确。

- 情景分析确实是评估潜在未来事件及其影响的有效工具能够模拟不同市场条件下的潜在风险情况，有助于识别和评估极端事件的影响，为制定风险应对策略提供前瞻性的参考。

D 选项错误。

- 预算控制系统主要是财务管理工具，而非风险识别的主要方法，其主要目的是控制支出和管理预算，虽然可能帮助发现某些财务风险，但范围有限，不能有效识别非财务类风险（如操作风险、市场风险等）。

考察: 理解风险识别的方法。(风险识别的方法有：头脑风暴、损失数据分析、场景分析)

2. A board member at a growing technology company questions the Chief Risk Officer about various risk management initiatives and their impact on shareholder value. Which of the following risk management policies is MOST likely to enhance shareholder wealth?

- A. Strategic hedging programs should completely eliminate all market risks to ensure maximum protection of shareholder value, regardless of hedging costs
- B. Risk management frameworks should prioritize maintaining the lowest possible debt levels at all times, even if it means foregoing profitable growth opportunities
- C. Risk-adjusted compensation structures that align management incentives with appropriate risk-taking while promoting long-term value creation
- D. Conservative risk policies that systematically eliminate high-volatility projects regardless of their potential returns, focusing solely on stable, predictable investments

答案:C

解析:

A 选项错误。

- 完全消除所有市场风险的做法过于极端，且可能产生过高的对冲成本。有效的风险管理应该是在风险和收益之间找到平衡，而不是不计成本地追求零风险。过度对冲反而会损害股东价值。

B 选项错误。

- 过分强调维持最低债务水平而放弃有价值的增长机会是不明智的。适度的财务杠杆可以帮助公司把握市场机遇，创造更多股东价值。风险管理的目标是优化而不是最小化债务水平。

C 选项正确。

- 风险调整后的薪酬结构（如长期股权激励、风险调整后的业绩考核、延期支付和追回条款等）能够将管理层利益与股东长期利益对齐，避免过度规避风险或过度冒险，从而促进价值创造型的风险承担。这种平衡的方法最有利于提升股东价值。

D 选项错误。

- 机械地排除所有高波动性项目而不考虑其潜在回报是过于保守的做法。特别是对于科技公司，创新项目往往伴随较高波动性，但可能带来突破性回报。这种过度保守的策略可能会错失重要的价值创造机会。

考察: 理解风险管理的风险-收益关系。(风险管理需要在风险和收益之间找到平衡点)

3. In a recent seminar on financial risk management, a group of researchers is discussing the various types of risks that affect investment portfolios. As part of their analysis, they aim to clarify the definitions and implications of different risk categories. Which of the following statements regarding the types of risks is correct?

- A. Expected loss can only be calculated using complex mathematical models and cannot be based on historical data analysis.
- B. Unexpected loss is predictable and can be precisely measured using standard risk metrics.
- C. Knightian uncertainty represents situations where all possible outcomes and their probabilities can be fully quantified.
- D. Unknown unknown refers to risks that are completely unforeseen and cannot be anticipated or measured.

答案:D

解析:

A 选项错误。

- 预期损失（Expected loss）不仅可以通过复杂的数学模型计算，更重要的是可以基于历史数据分析得出。历史数据分析实际上是预期损失计算中最基础和最直接的方法之一。

B 选项错误。

- 意外损失（Unexpected loss）本质上就是难以预测的，它代表超出预期损失的部分。正是因为其不可预测性，才需要额外的资本缓冲来应对这类损失。

C 选项错误。

- Knightian 不确定性恰恰相反，它指的是那些无法量化概率的情况。在这种情况下，决策者虽然知道可能的结果，但无法准确评估其发生的概率。说它可以”完全量化”是对其本质的误解。

D 选项正确。

- 未知的未知（Unknown unknown）是指完全无法预见和无法测量的风险，通常是指那些在风险评估中未被考虑的潜在事件。这种风险是最难以管理的。

考察: 理解不同类型风险的基本概念。（预期损失是可以通过历史数据预测的，而意外损失和 Knightian 不确定性都具有不可预测性）

4. A portfolio manager is discussing the relationship between risk and reward with her team. Which of the following statements BEST describes this relationship?

- A. There is a simple linear relationship between risk and reward, where higher risk always leads to proportionally higher returns
- B. The risk-reward relationship is purely determined by credit risk, as demonstrated by the yield spread between government and corporate bonds
- C. The relationship between risk and reward is complex, involving both measurable risks (EL) and unmeasurable uncertainties, with various factors affecting the trade-off
- D. Risk and reward relationships remain stable over time, allowing investors to consistently predict returns based on historical risk measures

答案:C

解析:

A 选项错误。

- 风险和收益的关系并非简单的线性关系。比如当市场风险偏好发生变化时，即使是相同风险水平的资产，其收益率也会发生变化。就像疫情期间，大家突然都变得谨慎了，即使是相同的投资标的，收益率要求也会随之上升。

B 选项错误。

- 虽然信用风险确实是一个重要因素（如政府债券和公司债券的收益率差异），但风险收益关系还受到流动性风险、税收影响等多种因素的影响。

C 选项正确。

- 风险与收益的关系确实存在权衡，但这种关系远比简单的”高风险高收益”复杂。一方面，风险包含了可以用概率函数衡量的预期损失 (EL)，另一方面还包含了无法衡量的不确定性（意外损失）。就像在赌场里，你不仅要考虑概率算得出来的期望收益，还得提防那些”意外惊喜”。

D 选项错误。

- 风险收益关系会随时间和市场环境变化而变化。当市场风险容忍度较高时，高风险和低风险资产之间的收益率差异可能会缩小，反之亦然。

考察: 理解风险-收益关系的复杂性。（一般情况是风险和收益正相关）

5. A doctoral candidate studying risk management is preparing a thesis defense on the implications of market, credit, and operational risks in financial institutions. Which of the following statements regarding these risks is incorrect?

- A. People risk refers to the risk of fraud by internal employees and/or external parties, unrelated to incompetence or lack of training.

B. Default risk pertains to the failure of a position to pay and fulfill its obligations on the settlement date.

C. Non-directional risk involves non-linear exposure to changes in economic or financial variables, particularly evident in options.

D. Commodity price risk arises from significant price fluctuations due to a lack of liquidity in the market.

答案:B

解析:

A 选项正确。

- 人员风险确实指的是内部员工和/或外部人员进行欺诈的风险。这种风险与员工的无能或缺乏适当培训无关。

B 选项错误。

- 违约风险特指借款人未能按时偿还债务的风险，而选项中提到的“在结算日未能支付和履行义务”实际上是结算风险的定义。结算风险是指在交易结算时，交易对手未能履行其财务义务的风险。因此，这个选项的表述不准确，未能正确区分违约风险和结算风险。

C 选项正确。

- 非指向性风险确实涉及对经济或金融变量变化的非线性暴露，尤其在期权等衍生品中表现得尤为明显。这种风险的特性使得其在风险管理中需要特别关注。
- 假设你有一个行使价为 \$50 的看涨期权。小幅的标的资产价格变化（如从 \$40 到 \$50）可能导致期权价值几乎没有变化，但一旦价格超过 \$50，期权的价值就会大幅增加。（非线性）

D 选项正确。

- 商品价格风险是指商品（如贵重商品）的价格波动金属，贱金属，农产品，能源) 由于集中特定商品掌握在相对较少的市场参与者手中。
- 商品价格风险可能面临显著的价格不连续性（例如，价格突然从一个水平跳到另一个水平）。

考察: 对不同类型风险的识别和理解。（违约风险与结算风险别混淆了，同时留意非线性风险）

6. A risk analyst at Silverman Asset Management is reviewing several recent incidents to improve their risk classification system. Which of the following events is CORRECTLY matched with its corresponding risk type?

A. Inadequate staff training leading to misuse of the order management system is classified as legal risk

B. Credit spread widening following recent corporate bankruptcies is classified as credit risk

C. An options writer lacking resources to fulfill contractual obligations is classified as credit risk

D. Cross-jurisdictional netting issues with credit swap counterparties is classified as operational risk

答案:C

解析:

A 选项错误。

- 由于员工培训不足导致的系统误用应归类为操作风险，这类风险源于内部流程、人员和系统的缺陷或失效，而非法律合规问题

B 选项错误。

- 企业破产潮引发的信用利差扩大应归类为市场风险，因为这反映了整体市场环境和经济状况的变化，而不是针对特定交易对手的信用状况恶化。
- 就像 2008 年金融危机时，连” 太大不能倒” 的雷曼兄弟都说拜拜了，整个市场的信用利差都在跳广场舞，这明显不是某家公司自己信用不好的问题，而是整个市场都在蹦迪嘛。如果你把这种全市场都在抖动的情况归为信用风险，那就好比把整个广场舞大妈的集体活动归结为某位大妈跳舞姿势不标准一样，显然不合适

C 选项正确。

- 期权卖方无力履行合约义务是典型的信用风险，因为这直接反映了交易对手的违约风险，即交易对手无法履行其合约义务的风险

D 选项错误。

- 跨司法管辖区的净额结算问题应归类为法律风险，因为这涉及不同法律体系下合约执行的不确定性，以及法律框架差异带来的合约履行障碍

考察: 掌握市场风险、信用风险、操作风险、法律风险的基本特征和分类方法。(credit spread widening 是市场风险，不是信用风险)

7. A risk analyst at a fixed-income investment firm is currently evaluating the impact of various risk events on the firm's portfolio. The analyst is particularly focused on understanding how extreme risk events and structural changes can affect market dynamics. Which of the following statements about extreme risk events and structural change is correct?

- A. The correlation between extreme events remains constant, making traditional risk models consistently reliable over time.
- B. Extreme events are more likely to occur during periods of market stability than during periods of structural change.
- C. In extreme market conditions, different assets or risk factors tend to exhibit extreme negative movements at the same time, increasing the frequency of tail events.
- D. Structural changes have minimal impact on risk factor synchronization, as markets always maintain their independent behavior patterns.

答案:C

解析:

A 选项错误。

- 极端事件之间的相关性并非保持不变，而是会随市场环境变化而变化。在市场压力期间，相关性往往会显著增强，使得传统风险模型（如基于正态分布的模型）失效。这种动态变化的特性是风险管理中的重要考虑因素。

B 选项错误。

- 这种说法完全颠倒了因果关系。实际上，市场结构性变化往往会增加极端事件发生的可能性，而不是相反。结构性变化可能打破市场原有的平衡，引发连锁反应。

C 选项正确。

- 风险因素之间相关性的增加确实会提高尾部事件的发生频率。当市场中的各种风险因素高度相关时，一个因素的极端变动更容易引发其他因素的连锁反应，从而增加了尾部事件（极端事件）发生的概率。

D 选项错误。

- 结构性变化（如行为模式改变、创新或监管变革）实际上会显著影响风险因素之间的关联性。这些变化可能导致市场参与者行为的同步化，打破原有的市场运行规律，而不是保持独立的行为模式。

考察: 理解尾部风险和结构性变化的关系。（尾部风险是极端事件，结构性变化是系统性风险）

8. A risk management team at a global asset management firm is conducting a quarterly review of risk incidents to enhance their risk classification framework. The team needs to identify which of the following scenarios represents a fundamentally different type of risk compared to the others:

- A. The firm's proprietary options pricing model consistently generates values that deviate from market prices due to a coding error in the volatility calculation.
- B. A trading desk exceeds its pre-established counterparty exposure limits due to failure in the automated monitoring system.

- C. A significant portion of the firm’s fixed-income positions cannot be liquidated during a market stress event due to sudden deterioration in bond market liquidity.
- D. A senior trader accidentally executes a large equity trade using incorrect decimal places due to interface display issues in the trading system.

答案:C

解析:

操作风险主要源于内部流程、人员、系统导致的损失风险。关键在于区分：操作风险通常来自可以通过改进内部流程、系统或培训来控制的因素，而市场流动性风险则是外部市场环境变化导致的系统性风险，公司难以直接控制。

A 选项错误。

- 这反映了可通过内部流程改进来解决的模型风险，其根源是程序编码错误导致波动率计算偏差，进而影响期权定价准确性。

B 选项错误。

- 这体现了自动监控系统的技术缺陷导致交易限额被突破，属于可以通过加强系统建设和内部控制来防范的运营问题。

C 选项正确。

- 这是典型的市场流动性风险，源于整体市场环境的系统性恶化导致无法以合理价格平仓，而非公司内部运营缺陷所致。

D 选项错误。

- 这涉及交易员的操作失误和系统界面设计缺陷共同导致的交易执行错误，属于可以通过人员培训和系统优化来改善的典型操作风险。

考察: 掌握操作风险的定义。(抓住内部流程、人员、系统、培训这些字眼)

9. A retail company is facing a significant payment to suppliers next week. Due to a recent decline in consumer spending, the company has not generated enough revenue to cover its obligations. The company is unable to secure additional financing quickly. As a result, it must sell inventory at a reduced price to raise cash. Which of the following risks is the company exposed to?

- A. Funding liquidity risk.
- B. Systemic Liquidity risk.
- C. Trading liquidity risk.
- D. Both funding liquidity risk and trading liquidity risk.

答案:D

解析:

A 选项错误。

- 仅涉及融资流动性风险，因为公司无法通过借贷或其他融资手段获得足够的资金来支付即将到期的供应商款项。

B 选项错误。

- 系统性流动性风险通常指整个金融系统的流动性紧缩，而本题中公司面临的问题是由于自身的财务状况和市场条件，而非整个系统的流动性问题。

C 选项错误。

- 仅涉及交易流动性风险，因为公司需要快速出售库存以获取现金，但由于市场需求下降，必须以低于公允价值的价格出售。

D 选项正确。

- 公司面临融资流动性风险，因为无法及时获得资金来履行财务义务。这种风险指企业在需要资金时无法以合理成本获得资金的风险。

- 同时，由于需要以折扣价出售库存以获取现金，公司也面临交易流动性风险。这种风险指在需要快速出售资产时，市场上没有足够的买家，导致无法以公允价值出售的风险。
- 这两个风险共同影响了公司的财务状况，使其难以维持正常运营。

考察: 掌握流动性风险的定义。（流动性风险分为融资流动性风险和交易流动性风险）

10. In one case, during the 2012 JPMorgan Chase trading loss incident, known as the "London Whale," a trader's miscalculation and oversight in risk management led to significant trading losses. Specifically, the trader failed to accurately assess the risk exposure and did not follow the established risk management protocols. This situation would be an example of:

- A. Market risk due to external market fluctuations.
- B. Operational risk from internal process failures.
- C. Strategic risk from poor long-term planning.
- D. Liquidity risk from insufficient cash flow.

答案:B

解析:

A 选项错误。

- 市场风险通常涉及外部市场波动对资产价值的影响，而本题中损失是由于内部操作失误导致的。

B 选项正确。

- 操作风险源于内部流程、人员或系统的失误。在“伦敦鲸”事件中，交易员未能准确评估风险敞口，并未遵循既定的风险管理协议，导致了重大交易损失，属于典型的操作风险。

C 选项错误。

- 战略风险涉及长期规划和决策失误，而本题中的问题是由于短期操作失误引起的。

D 选项错误。

- 流动性风险涉及无法及时获得现金流以履行财务义务，而本题中的损失与流动性无关。

考察: 掌握各类别风险的定义。（抓住员工操作失误这些字眼）

11. As a risk consultant preparing training materials for new risk analysts, which of the following statements about different types of financial risks is correct?

- A. Different risk types require specific expertise and management approaches. Risk and reward are inherently linked, which explains why many banks actively pursue higher-risk assets in their portfolios.
- B. Modern risk management has successfully identified all possible risk types, and we now have established control measures for each of them.
- C. Market risk manifests in various forms including equity risk, interest rate risk, and currency risk, but does not encompass commodity price fluctuations.
- D. Credit risk is determined by default probability, exposure at default, and recovery rates. The exposure amount remains constant across all types of financial transactions.

答案:A

解析:

A 选项正确。

- 不同风险类型需要特定的专业知识和管理方法，这反映了风险管理的专业性。风险与回报的正相关性是金融市场的基本原理，这解释了为什么银行会主动承担某些风险以获取相应回报。

B 选项错误。

- 风险类型会随市场发展不断演变，新的风险形式（如网络风险）持续出现，风险管理是动态发展的过程，不可能完全识别和控制所有风险。

C 选项错误。

- 市场风险范围包括股票、利率、汇率和商品价格风险，该选项错误地排除了商品价格风险，这种划分显示了对市场风险范围的错误理解。

D 选项错误。

- 信用风险敞口会随交易类型和市场环境变化而变动，特别是在衍生品交易中表现明显。该选项忽视了风险敞口的动态特性，对信用风险特征理解不完整。

考察: 对金融机构各类风险特征的基本认识。（在衍生品交易中，风险敞口会随着市场的变化而变化）

12. A risk management team at a commercial bank is reviewing its practices to identify areas for improvement. During the review, the team discusses various scenarios that could indicate failures in their risk management processes. In this context, which of the following scenarios is not necessarily considered a failure of risk management?

- A. The team discovers that there has been an incorrect measurement of known risks.
- B. The team realizes there has been a failure in communicating risk issues to top management.
- C. The team acknowledges a failure to minimize losses on credit portfolios.
- D. The team identifies a failure to use appropriate risk metrics.

答案:C

解析:

A 选项错误。

- 不正确的已知风险测量会导致错误的决策，从而影响风险管理的有效性。这被视为风险管理的失败。

B 选项错误。

- 未能向高层管理层传达风险问题会导致决策失误，影响整体风险管理策略的实施，因此这也是风险管理的失败。

C 选项正确。

- 未能最小化信用投资组合的损失并不一定被视为风险管理的失败。公司可能在评估风险与收益时做出了合理的判断，认为潜在的收益足以补偿所承担的风险。
- 此外，公司可能选择不采取措施来减少损失，这并不一定意味着其风险管理存在缺陷。

D 选项错误。

- 未能使用适当的风险指标会导致对风险状况的误判，从而影响风险管理的有效性。这也是风险管理的失败。

考察: 对风险管理不同情境的理解。（追求的不是损失最小化）

13. A large commercial bank is evaluating the performance of its different business units for resource allocation decisions. The investment banking division shows a return on equity of 22%, while the retail banking division shows 15%. The CFO suggests using Risk-Adjusted Return on Capital (RAROC) for a more meaningful comparison. In this context, which of the following statements about RAROC is correct?

- A. The bank should use RAROC as their primary regulatory reporting metric since it uses regulatory capital requirements in its calculation.
- B. RAROC would provide a fair comparison between the two divisions despite their different risk capital requirements and business models.

- C. Since RAROC generates precise numerical metrics, senior management can make allocation decisions based purely on these numbers without understanding the underlying business dynamics.
- D. The bank should adopt RAROC because it uses a standardized formula with economic capital as the denominator, ensuring consistent results across all institutions.

答案:B

解析:

RAROC 的定义:

$$RAROC = \frac{\text{预期收益} - \text{预期损失}}{\text{经济资本}}$$

A 选项错误。

- RAROC 使用经济资本而非监管资本，主要用于内部绩效评估和资源配置，各机构的计算方法可能不同。

B 选项正确。

- RAROC 通过在分母中使用经济资本，考虑了不同业务的风险特征，使得风险收益比较更有意义。
- 例如，虽然投资银行部门的 ROE 更高 (22% vs 15%)，但考虑到其更高的风险资本要求后，实际的风险调整后收益可能与零售银行部门相当。

C 选项错误。

- RAROC 是决策的辅助工具，管理层仍需理解业务本质和风险驱动因素。纯粹依赖数字可能忽视重要的定性因素和长期战略考虑。

D 选项错误。

- 经济资本的计算方法因机构而异，需要考虑具体业务模式和风险偏好，没有统一的标准公式。

考察: 理解 RAROC 的定义。(RAROC 是风险调整后的资本回报率)

14. In the context of corporate finance, companies often face the challenge of allocating limited resources across various projects with differing risk profiles. To make informed decisions, firms must evaluate the risk-adjusted performance of these projects. Which of the following statements about the use of RAROC (Risk-Adjusted Return on Capital) in this context is correct?

- A. RAROC allows firms to compare the performance of business lines that require different amounts of economic capital by using economic capital as the denominator.
- B. The formula for RAROC is reward/risk, where reward can be described in terms of after-tax risk-adjusted expected return, and risk should be measured only in terms of economic capital.
- C. The practical application of RAROC is very simple, as both the numerator and denominator of this indicator can be accurately calculated, so policymakers do not need to understand the meaning of numbers and drivers of indicators.
- D. When comparing different business lines, the profitability must come to the same conclusion, regardless of whether the profitability is risk-adjusted or not.

答案:A

解析:

RAROC 的定义:

$$RAROC = \frac{\text{预期收益} - \text{预期损失}}{\text{经济资本}}$$

A 选项正确。

- 通过使用经济资本作为分母，企业可以比较分配了不同经济资本的业务线的业绩。这使得不同业务线的风险调整后收益具有可比性。

B 选项错误。

- 虽然 RAROC 的公式为收益/风险，但风险应仅以经济资本衡量，而不是监管资本。监管资本是基于监管要求，而非企业的实际风险状况。

C 选项错误。

- RAROC 指标的实践应用有难度，因为其依赖于风险资本的计算，业务部门的经理可能对其有效性提出质疑。因此，决策者应始终理解数字的含义和指标的驱动因素，以便做出明智的决策。

D 选项错误。

- 在比较不同业务部门的业绩时，是否对盈利能力指标进行风险调整，得出的结论可能不同。风险调整后的盈利能力可以揭示业务线在风险调整后的真实表现。

考察: 理解 RAROC 的定义。(RAROC 是风险调整后的资本回报率)

15. A junior credit analyst at a commercial bank is evaluating a loan application. The bank has extended a loan of ¥12 million to a manufacturing company. Based on the bank’s assessment, the probability of default (PD) is 3% (0.03), and the loss given default (LGD) is 75% (0.75). The company has provided collateral worth ¥4 million. What is the exposure at default (EAD) after considering the collateral?

- A. ¥12 million
- B. ¥8 million
- C. ¥6 million
- D. ¥4 million

答案:B

解析:

A 选项错误。

- ¥12 million 是贷款总额，这个数值仅代表银行发放的贷款金额。在计算违约风险敞口时，必须考虑抵押品的保护作用。直接使用贷款总额会显著高估实际的风险敞口。

B 选项正确。

- 违约风险敞口 (EAD) 就是在考虑抵押品后的净风险敞口。
- 计算方法：贷款总额 - 抵押品价值 = ¥12 million - ¥4 million = ¥8 million
- 这种计算方法准确反映了银行的实际风险敞口，即在扣除抵押品保护后可能损失的最大金额。

C 选项错误。

- ¥6 million 是将净敞口乘以 LGD 得到的结果 $((¥12 \text{ million} - ¥4 \text{ million}) \times 75\% = ¥6 \text{ million})$ 。
- 违约风险敞口 (EAD) 的计算不需要考虑 LGD。
- LGD 是用于计算预期损失 (Expected Loss) 的组成部分，而不是用于计算风险敞口。

D 选项错误。

- ¥4 million 仅仅是抵押品的价值。抵押品价值只是用于从贷款总额中扣除的金额，而不是最终的风险敞口。这个选项完全忽视了原始贷款金额这个关键因素。

考察: 理解违约风险敞口的计算。(违约风险敞口是违约后银行可能损失的金额)

16. A risk manager at an investment bank is reviewing the risk management process documentation. Which of the following describes the correct sequence of risk management steps?

- A. Risk Assessment → Risk Identification → Risk Analysis → Risk Management → Risk Evaluation

- B. Risk Identification → Risk Analysis → Risk Assessment → Risk Management → Risk Evaluation
- C. Risk Management → Risk Identification → Risk Analysis → Risk Assessment → Risk Evaluation
- D. Risk Evaluation → Risk Identification → Risk Analysis → Risk Assessment → Risk Management

答案:B

解析:

A 选项错误。

- 风险评估不应该是第一步，因为在进行评估之前，需要先识别和分析风险。这个顺序打乱了风险管理的基本逻辑流程。

B 选项正确。

- 风险管理的正确步骤顺序如下：
 - 第一步：风险识别 (Risk Identification)
 - 判断是什么风险，风险属于什么分类。这是整个过程的基础，必须首先明确面临的风险
 - 第二步：风险分析 (Risk Analysis)
 - 对已识别的风险进行分级、评分、计算、量化等。这一步帮助我们深入理解风险的特征和程度
 - 第三步：风险评估 (Risk Assessment)
 - 评估风险敞口带来的影响并评估金融工具的成本和收益。在完成分析后，对风险进行综合评估
 - 第四步：风险管理 (Risk Management)
 - 构建四个风险管理策略。基于前面的评估结果制定具体的管理措施
 - 第五步：风险评价 (Risk Evaluation)
 - 将业绩评估结果反馈到相应的部门。相应部门根据评估结果对风险管理策略进行调整

C 选项错误。

- 风险管理不应该是第一步，因为在制定管理策略之前需要先了解和评估风险。这个顺序违背了先识别后管理的基本原则。

D 选项错误。

- 风险评价不应该是第一步，因为评价是对整个风险管理过程的总结和反馈。在评价之前需要先识别、分析、评估和管理风险。

考察: 理解风险管理步骤的顺序。（风险管理步骤的顺序是：风险识别、风险分析、风险评估、风险管理、风险评价）

17. A risk analyst at a hedge fund is studying the concept of tail loss in financial risk management. Which of the following statements about tail loss is correct?

- A. Tail losses refer to the highly volatile losses that occur during years of favorable economic conditions.
- B. Tail losses are easily found in historical data due to their high probability of occurrence.
- C. Tail losses can be analyzed using Extreme Value Theory (EVT) to guard against unexpected large losses that could lead to insolvency and default.
- D. Tail losses only affect short-term market volatility and do not pose significant long-term risks to financial institutions.

答案:C

解析:

A 选项错误。

- 尾部损失不是发生在经济形势良好时期，而是在经济形势恶化或极端市场条件下。这种说法混淆了正常市场波动和尾部风险的概念。

B 选项错误。

- 尾部损失是低概率事件，在历史数据中较难观察到。正是因为其罕见性，使得尾部损失的识别和预测变得困难。

C 选项正确。

- 极值理论 (EVT) 是分析尾部损失的有效工具。EVT 可以帮助机构评估极端市场条件下的潜在损失，预防可能导致违约的重大损失，建立适当的风险管理策略。

D 选项错误。

- 这种说法严重低估了尾部损失的影响。尾部损失虽然是低概率事件，但可能造成系统性风险的积累，金融机构的长期稳定性受损，市场信心的严重打击。

考察: 理解尾部损失的概念。(EVT 是分析尾部损失的有效工具)

18. A derivatives trader at an investment bank is studying the concept of Wrong Way Risk in financial risk management. Which of the following statements about Wrong Way Risk is correct?

- A. Wrong Way Risk refers to situations where risk exposure decreases when market conditions deteriorate.
- B. Wrong Way Risk typically occurs when market participants' behaviors align with market trends.
- C. Wrong Way Risk is rarely seen in real estate markets and mainly appears in financial markets.
- D. Wrong Way Risk occurs when there is a positive correlation between counterparty default risk and risk exposure.

答案:D

解析:

A 选项错误。

- 这完全误解了错向风险的概念。错向风险恰恰相反，指的是在市场条件恶化时，风险敞口反而增加的情况。

B 选项错误。

- 错向风险与市场参与者行为是否跟随市场趋势没有直接关系，而是关注风险敞口与市场条件之间的不利关联性。

C 选项错误。

- 错向风险实际上存在于各类市场中，包括：房地产市场、金融市场、商品市场、信用市场。任何存在交易对手风险的市场都可能出现错向风险。

D 选项正确。

- 这准确描述了错向风险的核心特征：交易对手的违约风险与风险敞口呈正相关，在不利市场条件下风险管理难度加大，增加了潜在损失的可能性。

考察: 理解错向风险的概念。(错向风险是交易对手的违约风险与风险敞口呈正相关，在不利市场条件下风险管理难度加大，增加了潜在损失的可能性)

19. A risk researcher at a central bank is analyzing the implications of structural changes in financial markets. Which of the following statements most accurately describes the relationship between structural changes and systemic risk in financial risk management?

- A. Structural changes invariably lead to risk reduction through enhanced system stability and improved market equilibrium mechanisms.
- B. Structural changes operate independently of the financial system's fundamental architecture, thus bearing no significant implications for risk management protocols.
- C. Structural changes can fundamentally alter the underlying topology of financial networks, potentially amplifying tail risks and systemic vulnerabilities.

D. Structural changes exhibit asymmetric effects across financial institutions, with their impact being inversely proportional to institutional scale.

答案:C

解析:

A 选项错误。

- 这种决定论的观点过于简单化。结构性变化不一定总是导致风险降低，有时反而会增加系统的复杂性和不确定性，从而加大风险。

B 选项错误。

- 这个观点忽视了结构性变化与金融系统之间的内在联系。实际上，结构性变化往往会深刻影响金融系统的运行机制和风险传导路径。

C 选项正确。

- 这个选项准确描述了结构性变化的本质影响：可能改变金融网络的基础结构，影响风险在系统中的分布和传导，可能导致尾部风险的积累，增加系统性风险的可能性

D 选项错误。

- 这种规模区分的说法缺乏实证支持。结构性变化往往会影响整个金融体系，大型机构可能因为其系统重要性而受到更显著的影响。

考察: 理解结构性变化对系统性风险的影响。（结构性变化可能导致尾部风险的积累，增加系统性风险的可能性）

20. A financial economist is studying the relationship between reputational risk and bank run risk in financial institutions. Which of the following statements most accurately characterizes the interaction between these two types of risks?

- A. Reputational risk and bank run risk operate independently, as they are driven by fundamentally distinct market mechanisms and behavioral factors.
- B. Credit risk management failures directly trigger bank runs through liquidity constraints, bypassing some reputational intermediary effects.
- C. Reputational deterioration can catalyze bank runs by amplifying negative perceptions about an institution’s financial stability.
- D. Bank run risk systematically precedes reputational damage due to depositors’ direct access to institutional financial information.

答案:C

解析:

A 选项错误。

- 这种观点错误地将两种风险完全割裂。实际上，声誉风险和挤兑风险往往通过市场信心机制紧密关联，构成风险传导链条的重要环节。

B 选项错误。

- 这种直接因果关系的假设过于简化。信贷风险管理失败通常首先影响机构声誉，损害市场信心，然后才可能演变为挤兑风险。

C 选项正确。

- 这个选项准确描述了两种风险之间的关系：认识到声誉是市场信心的基础，强调了声誉损害如何放大负面预期，揭示了风险传导的中介机制，体现了行为金融学中的群体心理效应。

D 选项错误。

- 这种时序假设与实际观察不符。储户通常并不具备充分的信息优势，挤兑往往是声誉受损后市场信心崩溃的结果。

考察: 声誉风险 (声誉风险作为挤兑风险的触发机制和传导渠道)

21. The risk manager of a large agricultural trading company was evaluating a failed hedging strategy. The company uses soybean futures contracts to hedge the price of cottonseed, which is mainly used in livestock feed. During implementation, risk managers saw a significant deterioration in hedging effectiveness, mainly due to an unexpected change in the correlation between the prices of the two commodities. Which of the following most accurately identifies the main types of risk that lead to hedging failure?

- A. Operational risk, because the execution of the hedging strategy may have had procedural or system-related flaws.
- B. Market risk, because the price correlation between the underlying assets has changed significantly.
- C. Liquidity risk, because the depth of trading in the relevant market may not be sufficient to support the hedging needs.
- D. Business and strategic risk, because the choice of the hedging strategy may not align with the company’s overall risk management objectives.

答案:B

解析:

A 选项错误。

- 案例中并未提及任何操作层面的问题。对冲失效的原因是市场相关性变化，而非执行过程中的操作失误或系统缺陷。

B 选项正确。

- 价格相关性的意外变化属于典型的市场风险，反映了商品市场基本面的动态变化，体现了跨商品对冲中的基差风险，说明市场条件的变化超出了预期范围。

C 选项错误。

- 大豆期货市场具有充足的流动性，案例中也未提及任何流动性相关的问题。流动性风险不是导致对冲失败的主要原因。

D 选项错误。

- 对冲失败源于市场条件的意外变化，而非战略选择不当。业务和战略风险通常涉及更长期的决策问题。

考察: 风险类型 (价格相关性的意外变化属于典型的市场风险)

3 考点 3: Risk Management Road Map

1. A newly appointed Chief Risk Officer (CRO) at a global investment bank is reviewing the firm’s risk appetite framework as part of their annual governance process. Which of the following statements BEST describes the characteristics of a firm’s risk appetite?

- A. Risk appetite represents the maximum level of risk a company can sustain without facing bankruptcy, and it reflects the current risk exposure of the organization
- B. Risk appetite is a general indicator of market sentiment, while industry-level risk appetite reported in media is a more static internal control established by specific company executives
- C. While risk appetite has an upper threshold (upper trigger), it functions like a one-sided confidence interval: there is no lower limit for risk as less risk is always preferable
- D. Risk appetite includes mechanisms (such as detailed policies and business-specific risk statements) and risk limit frameworks that connect top-level statements with daily risk management operations

答案:D

解析:

风险偏好框架是金融机构风险管理的核心要素，我们需要从以下几个方面理解其特征：

风险偏好的本质特征：

风险偏好 = 高层战略陈述 + 具体执行机制

其中：- 高层战略陈述定义了机构的整体风险容忍度 - 具体执行机制将战略转化为可操作的风险限额

风险偏好的边界设定：

风险承受能力 > 风险偏好上限 > 当前风险状况 > 风险偏好下限 > 0

A 选项错误。

- 混淆了风险偏好与风险承受能力的概念，风险偏好应当设定在风险承受能力之下，而不是等同于最大承受能力，也可以设定在当前风险状况之上。
- 这就像一个人的最大负重能力是 100 公斤，但他的日常训练重量（风险偏好）可能设在 60-80 公斤之间，既不会超过极限，又能保持适度的训练强度来获得收益。而当前实际负重（风险状况）可能是 50 公斤，他可以根据训练计划逐步增加重量。

B 选项错误。

- 刚好相反，行业的风险偏好是市场情绪的反映，而公司层面的风险偏好是内部控制的结果。
- 就像 2021 年加密货币市场火热时，媒体报道的行业风险偏好高涨，但许多传统金融机构的内部风险偏好框架依然保持谨慎，限制或禁止加密货币相关业务。

C 选项错误。

- 错误地认为风险偏好没有下限，实际上金融机构需要承担适度风险以获取收益，完全规避风险并非最优选择。

D 选项正确。

- 风险偏好框架需要包含具体的执行机制，将高层的风险政策转化为可操作的风险限额和管理工具。
- 这种机制确保了风险管理不仅停留在战略层面，而是能够在日常业务中得到有效实施。
- 风险偏好在实践中体现为两个关键方面：1. 董事会批准的风险偏好声明，这是一份内部文件，简化版通常出现在年报中。2. 将高层声明与日常风险管理操作联系起来的机制体系，包括详细的风险政策、业务特定风险声明和风险限额框架。

考察: 理解风险偏好框架的特征。（区分行业风险偏好和公司风险偏好）

2. The board of directors at a multinational corporation is reviewing its risk appetite framework. The Chief Risk Officer presents several statements about risk appetite setting. Which of the following statements about risk appetite is MOST accurate?

- A. Risk appetite can be effectively expressed through qualitative measures alone, such as detailed policy statements about which risks to retain, avoid, or transfer
- B. Risk appetite should be minimized to align with debtholders’ interests, as they are primarily concerned with receiving stable interest payments
- C. Risk appetite must be expressed through quantitative metrics alone, such as Value at Risk (VaR) limits and stress testing thresholds
- D. Risk appetite should be maximized to align with shareholders’ interests, as they benefit most from increased risk-taking and potential returns

答案:A

解析:

A 选项正确。

- 风险偏好可以完全通过定性方式表达，高管和董事会可以清晰地说明哪些风险要保留、规避或转移，这种定性表述足以指导风险管理决策。

B 选项错误。

- 过分强调债权人利益而最小化风险偏好是不合适的，风险偏好应当平衡各利益相关者的诉求，而不是完全倾向于某一方。
- 债权人倾向于最小化风险，收益上限被限制在固定利息水平；东倾向于承担更高风险，享有剩余索取权，收益上不封顶。

C 选项错误。

- 风险偏好不必局限于定量指标，实际上定性和定量方法的结合往往能提供更全面的风险管理指导。

D 选项错误。

- 单纯为了股东利益而最大化风险偏好是危险的，这忽视了其他利益相关者的合理诉求，可能损害公司的长期价值。
- 股东倾向于承担更高风险，享有剩余索取权，收益上不封顶；债权人倾向于最小化风险，收益上限被限制在固定利息水平。

考察：理解风险偏好的表达方式。（可以定性也可以定量）

3. A risk consultant is reviewing a company’s risk management framework and is assessing the alignment between risk appetite and risk capability. Which of the following statements is most likely to be incorrect?

- A. The risk appetite should be approved by the board of directors and needs to be consistent with the company’s business and company development.
- B. Risk appetite should be clearly expressed, so it needs to be described with a combination of qualitative and quantitative indicators.
- C. In daily operations, risk appetite should be lower than risk capacity and higher than the amount of risk the company is currently facing.
- D. Risk capability is determined by historical performance metrics and remains constant without the need for regular updates or adjustments.

答案:D

解析：

A 选项正确。

- 风险偏好需要通过董事会的同意，并且必须与公司的业务和发展战略保持一致。这确保了公司在追求增长的同时，能够在可接受的风险范围内运作。

B 选项正确。

- 风险偏好应当清晰表达，以便公司利益相关者能够理解和遵循。因此，使用定性和定量指标的结合来描述风险偏好是必要的。

C 选项正确。

- 在日常运营中，风险偏好应低于公司的风险承受能力，但高于公司当前面临的风险水平。这种设置确保公司在风险管理中保持灵活性和稳健性。

D 选项错误。

- 风险承受能力不应仅仅依赖于历史表现来确定。它需要定期重新评估，以反映市场条件、公司战略和外部环境的变化。忽视这一点可能导致风险管理策略的失效。

考察：理解风险偏好和风险承受能力的区别。（风险承受能力是公司能够吸收的最大风险，而风险偏好是公司愿意接受的风险水平）

4. In financial risk management practice, risk mapping serves as a crucial tool for identifying and assessing risk exposures. Which of the following statements most accurately describes the functionality and importance of risk mapping, particularly in terms of net settlement?

- A. Risk mapping primarily focuses on identifying financial statement risks while neglecting cash flow analysis aspects.
- B. Risk mapping evaluates counterparties' credit risk exposures and netting opportunities, enabling financial institutions to optimize capital efficiency and reduce counterparty risk.
- C. Risk mapping only needs to consider the most prominent one or two risk types rather than all risk categories facing the institution.
- D. Risk mapping should ignore risks that are difficult to track in terms of exposure and cash flows, such as data privacy and offshore risks.

答案:B

解析:

A 选项错误。

- 风险映射需要全面分析，不仅包括财务报表风险，还应包括现金流分析，以确保对风险的完整评估。

B 选项正确。

- 这个选项准确描述了风险映射在净额结算中的关键作用：评估交易对手信用风险；识别净额结算机会；优化资本使用效率；降低交易对手风险。
- 实际应用举例：
 - 风险映射识别出银行 A 与对手方 B 的交易敞口：
 - * 交易 1：应收 100 万
 - * 交易 2：应付 80 万
 - 映射分析结果：
 - * 发现可进行净额结算的交易组合
 - * 计算后风险敞口仅为 20 万
 - 最终效果：降低交易对手风险，减少资本占用

C 选项错误。

- 风险映射应该考虑机构面临的所有相关风险，而不是仅关注最显著的风险。选择性忽视某些风险可能导致风险管理的重大疏漏。

D 选项错误。

- 即使是难以量化的风险，如数据隐私风险和离岸风险，也应该纳入风险映射范围。这些风险虽然难以追踪，但可能对机构产生重大影响。

考察: 风险映射的工具属性和管理属性（识别和评估风险；通过净额结算优化资本使用）

5. A senior risk manager at a global financial institution is evaluating the effectiveness of various risk management approaches. Which of the following statements MOST ACCURATELY describes the implementation of risk management strategies?

- A. Accept Strategy: A technology company retains cybersecurity risks within its core business operations, leveraging its advanced IT infrastructure and internal expertise for active management.
- B. Avoid Strategy: An investment firm implements a comprehensive stress testing framework and maintains capital buffers to minimize potential market losses.
- C. Reduce Strategy: A mining company completely exits operations in politically unstable regions to eliminate geopolitical risks that could threaten its business continuity.
- D. Transfer Strategy: A multinational corporation can achieve perfect risk immunization through a combination of cross-currency swaps and dynamic hedging strategies.

答案:D

解析:

A 选项正确。

- 接受策略适用于公司具备专业能力管理的核心风险。科技公司在网络安全风险管理方面具有独特优势，可以通过内部控制有效管理。

B 选项正确。

- 降低策略（Reduce Strategy）通过主动措施控制风险水平。压力测试和资本缓冲是金融机构管理市场风险的基本工具。

C 选项正确。

- 避免策略（Avoid Strategy）适用于超出风险承受能力的情况。地缘政治风险可能导致资产完全损失，选择退出是审慎的决定。

D 选项错误。

- ”完全风险免疫”的说法本身就是错误的。即使采用最复杂的对冲策略，仍然存在基差风险（互换合约与实际风险敞口的不完全匹配）、交易对手风险（对冲工具本身引入的新风险暴露）以及成本限制（动态调整带来的交易成本）等问题。

考察: 风险管理策略的实施。（接受、避免、降低、转移）

6. A risk management researcher is studying how financial institutions evaluate the cost-effectiveness of different risk management strategies. Which of the following statements MOST ACCURATELY reflects the academic and practical considerations in this evaluation process?

- A. The costs of risk transfer strategies can be fully captured through standardized quantitative models, including both explicit hedging costs and implicit risk management expenses.
- B. Machine learning algorithms can precisely quantify competitive advantages gained from market volatility, enabling firms to make optimal strategic decisions based purely on data analytics.
- C. For risks that are difficult to quantify, such as emerging technological risks, firms should combine scenario analysis, expert judgment, and cost-benefit comparisons of mitigation options.
- D. Qualitative risks can be excluded from formal cost-benefit analysis as their financial impacts are typically negligible compared to quantifiable market risks.

答案:C

解析:

A 选项错误。

- 实际上，许多隐性成本（如声誉影响、关系维护成本）难以通过标准化模型完全捕捉，需要更全面的评估框架。

B 选项错误。

- 虽然机器学习可以提供有价值的洞察，但市场竞争优势的实现还需要考虑多个定性因素，如市场心理、监管变化等。

C 选项正确。

- 准确反映了处理难以量化风险的最佳实践：结合定性和定量方法，通过情景分析评估潜在影响，利用专家判断补充数据局限，并进行全面的成本效益分析。

D 选项错误。

- 历史表明，网络安全、声誉等定性风险可能造成重大财务损失，忽视这些风险的分析可能导致严重的风险管理缺陷。

考察: 风险管理策略的评估。（成本效益分析）

7. A newly appointed Chief Risk Officer at a global investment bank is reviewing the firm’s governance framework. During the review, she notices some inconsistencies in how risk appetite and business strategy are aligned. Which of the following statements regarding the firm’s risk appetite and/or its business strategy is most accurate?

- A. The firm’s risk appetite does not need to consider its willingness to accept risk.
- B. The board needs to work with management to develop the firm’s overall strategic plan.
- C. Management will set the firm’s risk appetite and the board will only provide its approval of the strategic plan.
- D. Management should obtain the risk management team’s approval once the business planning process is finalized.

答案:B

解析:

A 选项错误。

- 风险偏好必须考虑公司承担风险的意愿，这是风险管理框架的基础，若不考虑风险承担意愿，将导致风险限额设置不合理，业务发展与风险控制失衡。

B 选项正确。

- 反映了现代公司治理的最佳实践：
 - 董事会负责制定和批准风险偏好框架，管理层负责具体执行和日常管理，两者需要密切配合，确保战略目标与风险承受能力匹配。

C 选项错误。

- 风险偏好不应仅由管理层单方面设定，董事会需要积极参与风险偏好的制定过程，而不是仅做形式审批，这种做法可能导致风险偏好与股东利益不一致。

D 选项错误。

- 风险管理团队应从规划初期就参与其中，事后审批模式无法确保战略与风险偏好的一致性，可能错过最佳风险干预时机。

考察: 风险偏好和公司治理 (风险偏好由董事会设定)

8. Bank Y, a multinational financial institution, has decided to use currency futures and forward contracts to offset its estimated foreign sales exposure. The risk management team is evaluating this strategy. Which high-level risk mitigation strategy does this approach best represent?

- A. The bank accepts and manages all foreign exchange exposures through internal resources, which represents retaining risk.
- B. The bank completely eliminates business activities that generate foreign exchange exposure, which represents avoiding risk.
- C. The bank implements internal control measures to reduce the impact of exchange rate fluctuations, which represents mitigating risk.
- D. The bank shifts its foreign exchange risk to external parties through derivative instruments, which represents transferring risk.

答案:D

解析:

A 选项错误。

- 保留风险策略要求银行完全自行承担风险，使用期货和远期合约明显不属于内部承担风险的方式。

B 选项错误。

- 规避风险需要完全退出产生风险的业务活动，银行仍在继续开展外汇相关业务，只是采取了对冲措施。

C 选项错误。

- 风险缓释通常指通过内部控制措施来降低风险，使用金融衍生品属于外部风险转移而非内部控制措施。

D 选项正确。

- 通过期货和远期合约将风险转移给市场交易对手，这是典型的风险转移策略，利用金融工具实现风险的外部化。

考察: 风险管理策略 (弄明白这四个策略的含义)

4 考点 4: Hedging

1. An investment analyst at an equity hedge fund is evaluating whether the firm's equity investors should support management in hedging risks related to systematic and firm-specific factors. Should the firm's equity investors want managers to hedge risk?
- A. Always, if the firm strategy is to retain the risk.
- B. Never, unless hedging enables managers to meet short-term targets linked to their compensation.
- C. No, if the investor is diversified and financial markets are perfect and frictionless.
- D. Yes, if the investor is diversified and the strategy is sufficiently complex to suit the investor.

答案:C

解析:

A 选项错误。

- 如果公司的战略是保留风险，投资者通常不希望管理层对风险进行对冲，因为这可能会削弱潜在的收益。

B 选项错误。

- 对冲策略可以帮助公司管理和减少风险，从而保护长期投资的价值。例如，通过对冲利率风险或外汇风险，公司可以确保未来现金流的稳定性，这对于长期规划和投资决策至关重要。
- 此外，投资者通常希望公司采取合理的风险管理措施，以确保其投资的安全性和回报。因此，支持对冲策略可以被视为对长期目标的支持。

C 选项正确。

- 根据莫迪利安尼-米勒理论（MM 理论），在一个完美的市场中，投资者可以通过多元化投资组合来消除非系统性风险，而系统性风险是市场整体波动带来的风险，无法通过对冲来消除。因此，如果投资者已经实现了多元化，他们通常不需要管理层去对冲风险，因为市场的波动不会影响他们的整体投资回报。
- 这意味着在一个理想的 market 环境中，管理层的对冲行为不会改变公司的价值，投资者的风险已经通过多元化得到了有效管理。

D 选项错误。

- 尽管多元化的投资者可能会支持对冲，但如果策略过于复杂，可能会导致管理层无法有效执行对冲策略，反而增加风险。因此，投资者不一定希望管理层对冲风险。

考察: 对对冲的理解。（了解 MM 理论）

2. A risk analyst at a multinational corporation is assessing various hedging methods to mitigate financial risks. Which of the following statements about these methods is correct?
- A. Purchasing insurance is an important hedging method, as it is often cheaper than derivative instruments like swaps.
- B. In practice, the pricing of derivatives is complex, and hedging with derivatives is unlikely to be a zero-sum game.
- C. Within the assumptions of perfect capital markets, significant costs related to financial distress and bankruptcy are considered.
- D. The advantage of hedging with derivatives is that it typically allows companies to avoid extensive disclosure requirements, providing a strong incentive to hedge.

答案:B

解析:

A 选项错误。

- 虽然购买保险确实是一种重要的对冲方法，但保险与金融衍生品的使用有所不同。对冲通常涉及金融衍生品的使用，而保险则依赖于保险单。保险单与衍生工具的含义不同，因此不应视为同类金融工具。

- 此外，保险的成本并不总是低于衍生工具如互换，具体成本取决于市场条件和保险条款。

B 选项正确。

- 在实践中，衍生品的定价确实非常复杂，这意味着定价可能并不总是尽可能准确，因此也不一定总是反映所有相关的风险因素。
- 结果，在实践中，使用衍生工具进行对冲可能不是在期间之间或参与者之间转移风险的零和游戏，因为市场参与者的行为和 信息不对称会影响结果。（结合 C 选项的解析一起理解）

C 选项错误。

- 完美资本市场的假设未充分考虑财务困境和破产的成本，这与实际情况不符。根据威廉·夏普在 1964 年提出的资本资产定价模型（CAPM），在完美资本市场下，企业只需关注系统性风险（或贝塔风险），而不必担心特定于公司的非系统性风险，因为这种风险可以通过大规模投资组合的多样化以无成本的方式降低。
- 不幸的是，完美资本市场假设在实践中并不现实，且多样化活动会导致交易成本的产生，因此这些成本并不总是被纳入所有对冲方法的评估中。这使得企业在实际操作中面临更多的风险和成本，而不仅仅是理论上的系统性风险。

D 选项错误。

- 为对衍生工具进行套期保值将要求披露。实际上，衍生品的使用可能会揭示公司本希望保持私密的操作信息。
- 这种信息披露的成本可能会降低公司对冲风险的激励，因此并不总是有利于公司。

考察：对冲方法的劣势和挑战。（需要理解完美市场与零和游戏的关系）

3. A newly appointed Chief Risk Officer at a multinational company is evaluating the firm’s hedging policies. In a presentation to the board, several perspectives on derivative hedging strategies are presented. Which of the following statements MOST LIKELY misrepresents the characteristics of derivative hedging?

- A. Derivatives represent a strategic decision to transfer or mitigate specific risks while retaining others, allowing companies to optimize their risk exposure based on their competitive advantages.
- B. Hedging smoothen accounting earnings and provides financial reporting stability, and has a limited impact on cash flow, which means it has no impact on potential agency risk.
- C. Large conglomerates operating across diverse business sectors naturally achieve risk diversification through their portfolio effect, offering more robust protection than smaller companies.
- D. Steel manufacturers can cross-hedge raw material costs using iron ore futures, yet during systematic commodity price declines, unhedged smaller mills may gain unexpected competitive advantages through flexible spot purchasing.

答案:B

解析：

A 选项正确。

- 准确描述了衍生品作为风险管理工具的战略性质，强调了选择性风险转移的特点。
- 就像一家航空公司可能选择对冲燃油价格风险（因为这不是其核心竞争力），但保留航线网络优化的运营风险（因为这是其专长所在）。
- 或者一家跨国制造企业可能对冲外汇风险（因为汇率波动不是其竞争优势），但选择承担产品创新风险（因为这是其核心能力）。
- 这种选择性风险管理策略让公司能够专注于其最具竞争优势的领域，同时规避或转移那些非核心的风险敞口。

B 选项属于误解。

- 套期保值不仅影响会计收益，还能通过多种渠道影响公司价值和代理风险：
 - 通过提供稳定价格增加客户需求，进而提升现金流。

- 通过税收筹划降低税负，提高税后收益。
- 通过稳定财务状况降低融资成本，获得更优惠的商业条件。
- 然而，这种影响可能产生双面效应：
 - 积极方面：当套期保值用于增加公司现金流而非单纯规避风险时，能为股东创造价值。
 - 消极方面：管理层可能利用套期保值达到短期业绩目标，影响个人声誉和薪酬。
- 因此，套期保值与代理风险的关系是复杂的：它既可能通过增加公司价值来缓解代理问题，也可能被管理层用作实现个人利益的工具。风险管理人员需要权衡这些影响，确保套期保值策略符合公司整体利益。

C 选项正确。

- 正确反映了大型企业集团通过业务多元化实现自然对冲的优势。例如，业务组合效应、规模效应、地域分散和资源互补。

D 选项正确。

- 钢铁企业利用铁矿石期货进行交叉对冲是常见的成本管理策略，但在大宗商品系统性下跌时，这种提前锁定价格的做法反而可能失去竞争优势。相比之下，未对冲的小型钢厂因为能够灵活调整现货采购策略，反而在这种市场环境下获得了意外的成本优势。

考察：理解套期保值的多维度影响。（套期保值对代理问题存在影响）

4. A financial advisor is evaluating different strategies to manage the risk associated with a client's investment portfolio. The client is interested in understanding the benefits and drawbacks of hedging strategies. The advisor explains that while hedging can protect against downside risk, it also involves certain trade-offs. Which of the following is not an advantage of hedging risk?

- A. By reducing the volatility of earnings cash flow by hedging, a firm may reduce the cost of capital and enhance the ability to finance growth.
- B. Good risk management is often an indication to the firm's stakeholders that management is doing a good job, this is often reflected directly in the firm's stock price.
- C. Hedging may allow management better control over the firm's economic performance to better achieve the board's objectives.
- D. Risk management requires specialized skills, knowledge, infrastructure, and data acquisition and processing effort.

答案:D

解析：

A 选项错误。

- 风险对冲可以降低公司盈利的波动性，因此降低了融资成本和增强了财务增长能力，为风险对冲的优点。

B 选项错误。

- 良好的风险管理工作意味着公司内部的管理层有优秀的工作能力，这种情况往往会反映在股价上，为风险对冲的优点。

C 选项错误。

- 高级管理层可以通过风险对控制成本，从而控制公司经济利润，以达到董事会的目标，为风险对冲的优点。

D 选项正确。

- 风险管理需要专业技能、专业知识和相关设备，因此做好风险管理工作是有难度的，为风险对冲的缺点。

考察：风险对冲的优缺点。（风险管理需要专业技能、专业知识和相关设备，所以困难）

5. A multinational corporation, ABC Inc., is planning to launch a new product line in the Korean market. The company's executives are concerned about the potential currency fluctuations affecting their profit margins. To address this, Emily, the chief financial officer, is considering a currency hedging strategy to protect the company's financial interests. Which of the following is not an advantage of Emily's hedging strategy?

- A. Helps stabilize profits from the Korean market.
- B. Enables the board to develop more effective plans for the Korean market.
- C. May decrease the likelihood of financial distress for ABC Inc.
- D. Can significantly lower friction and transaction costs.

答案:D

解析:

A 选项正确，不选。

- 通过对冲货币风险，公司可以降低盈利的波动性，从而稳定来自韩国市场的利润。这是风险对冲的一个优点。

B 选项正确，不选。

- 风险对冲使公司能够更好地控制成本，从而使董事会能够为韩国市场制定更有效的发展计划。这是风险对冲的一个优点。

C 选项正确，不选。

- 通过有效的风险对冲，公司可以降低面临财务困境的可能性。这是风险对冲的一个优点。

D 选项错误。

- 风险对冲并不能显著降低摩擦和交易成本。事实上，实施对冲策略可能会增加这些成本，因此这不是风险对冲的优点。

考察: 风险对冲的优缺点。（风险对冲可以降低交易费用）

6. A risk management consultant is evaluating the implementation challenges of dynamic hedging strategies in modern financial markets. Which of the following statements MOST ACCURATELY reflects these challenges?

- A. Advanced risk modeling techniques can always accurately identify risk exposures, ensuring the effectiveness of hedging strategies under all market conditions.
- B. Market dynamics, such as changes in asset correlations and liquidity conditions, require continuous adaptation of hedging strategies and risk monitoring frameworks.
- C. The implementation of hedging strategies can follow a static approach, as the underlying risk factors maintain stable relationships over time.
- D. The rapid pace of market changes poses no significant challenge to hedging implementation, as any hedging strategy, even if imperfect, will reduce rather than amplify the firm’s risk exposure.

答案:B

解析:

A 选项错误。

- 过度依赖模型的危险性：模型假设可能在市场压力下失效，新兴风险可能超出模型的预测范围，复杂金融产品的风险特征可能被错误估计。实践表明，即使最先进的模型也可能在极端市场条件下失效。

B 选项正确。

- 准确反映了现代市场的动态特征：资产相关性在不同市场环境下的变化，市场流动性条件的波动，交易对手风险状况的演变。对冲策略需要持续调整以应对市场微观结构的变化，新的监管要求，创新金融产品带来的挑战。

C 选项错误。

- 静态对冲方法的局限性：忽视了市场动态变化的本质，低估了风险因素间关系的时变性，可能导致对冲效率显著下降。2008年金融危机就证明了静态风险管理方法的危险性。

D 选项错误。

- 这种观点严重低估了市场变化速度对对冲策略实施的挑战：快速变化的市场环境可能超出公司的管理能力，不完美的对冲策略可能产生比原始风险更大的损失，对冲策略的实施成本可能超过其带来的收益。例如，在高频交易环境下，滞后的对冲调整可能导致风险敞口的放大而非减少。

考察: 动态对冲的挑战。（动态对冲需要持续调整，而静态对冲方法可能无法应对市场动态变化）

7. A risk manager at a global investment bank is reviewing various types of risk limits. Which of the following statements MOST ACCURATELY describes the relationship between different limit types and their effectiveness?

- A. Stop loss limits are the most effective risk control tool as they can prevent future exposures from materializing in stressed market conditions.
- B. VaR limits provide comprehensive protection against extreme market events because they capture all potential loss scenarios through statistical modeling.
- C. Greek limits offer perfect control over option portfolio risks when implemented at the trading desk level without additional oversight.
- D. Concentration limits need to consider correlation effects, particularly as traditional relationships may break down during market stress periods.

答案:D

解析:

A 选项错误。

- 止损限额只能限制已实现损失，而不能预防未来风险敞口。在市场压力情况下，止损限额的执行可能受到流动性限制。

B 选项错误。

- VaR 存在经典模型风险。在异常市场压力下可能无法准确反映潜在损失程度。高层管理人员可能误解其含义。

C 选项错误。

- 希腊字母限额在交易台层面的实施存在多个潜在问题，例如交易员可能为了达到业绩目标而操纵计算参数或模型假设；缺乏额外监督可能导致风险限额被突破而未被及时发现；复杂期权组合的希腊字母计算依赖于特定模型假设，需要独立验证；不同交易策略的希腊字母可能存在对冲效应，需要组合层面的整体评估。

D 选项正确。

- 准确反映了集中度限额的关键特征：需要考虑相关性风险，在市场压力下相关性可能发生变化，要求对市场动态有深入理解。

考察: 风险限额的类型和有效性。（集中度限额需要考虑相关性风险）

8. A portfolio manager is evaluating different risk measurement approaches for a complex derivatives portfolio. Which of the following statements BEST describes the limitations of various risk analysis methods?

- A. Maturity/Gap limits effectively control all types of price risk as they manage the timing of transaction maturities.
- B. Notional limits provide accurate measurement of economic risk exposure for all derivative instruments including complex options.
- C. Stress testing results are always comprehensive because they capture all possible adverse scenarios that could affect the portfolio.
- D. Risk-specific limits require specialized expertise to interpret and can present challenges in terms of aggregation across portfolios.

答案:D

解析:

A 选项错误。

- 到期/缺口限额主要处理操作风险和流动性风险，不直接应对价格风险，仅关注交易时间分布而非风险本质。

B 选项错误。

- 名义限额可能与衍生品的经济风险关联度不高，对期权等复杂产品特别不准确，忽视了风险的非线性特征。

C 选项错误。

- 压力测试依赖于对市场行为的深入理解，难以确保覆盖所有可能的情景，存在无限多的可能情景。

D 选项正确。

- 准确反映了特定风险限额的特征：需要专业知识解读，跨组合汇总困难，实施和监控具有挑战性。

考察：风险分析方法的局限性。（特定风险限额需要专业知识解读，跨组合汇总困难，实施和监控具有挑战性）

9. A risk management consultant is reviewing different hedging applications across industries. Based on the characteristics and practical applications of these hedging strategies, which of the following statements is CORRECT?

- A. A brewery should avoid using futures contracts for barley price risk management as spot market purchases provide better flexibility and cost efficiency for batch processing operations.
- B. Airlines should retain all their fuel price risk exposure internally, as this approach provides better cost control than implementing partial hedging strategies.
- C. Foreign exchange risk management is optional for global operations, as natural hedging through diversified market presence automatically stabilizes cross-border revenue and cost structures.
- D. Interest rate swaps provide an effective tool for managing interest rate volatility risk by converting floating rate obligations to fixed rate payments.

答案:D

解析：

A 选项错误。

- 这种观点是错误的。期货合约实际上是管理商品价格风险的有效工具，特别适合批量采购的业务模式。通过锁定采购价格，企业可以获得可预测的成本结构，这对于啤酒厂这样需要稳定原材料供应的企业来说尤为重要。

B 选项错误。

- 航空公司完全保留燃油价格风险的做法存在严重缺陷。行业最佳实践是采用部分对冲策略，因为完全暴露于价格波动会威胁公司财务稳定性。企业需要在对冲成本和风险敞口之间寻找适当的平衡点。

C 选项错误。

- 这种观点严重低估了外汇风险管理的重要性。实际上，外汇风险管理对全球业务运营至关重要，需要系统性地管理不同市场的汇率波动影响。仅仅依赖业务多样化带来的自然对冲是远远不够的。

D 选项正确。

- 利率互换确实是管理利率风险的有效工具，能够将浮动利率债务转换为固定利率，帮助企业获得稳定可预测的现金流，有效降低利率市场波动带来的不确定性。

考察：衍生品在风险管理中的应用。（利率互换可以有效管理利率风险）

5 考点 5:Changes in regulations and corporate risk governance.

1. In the financial regulatory framework, the Dodd-Frank Act aims to enhance the stability and transparency of the financial system through a series of measures. Which of the following statements does not align with the actual goals of this legislation?

- A. The act verifies the accuracy of financial reporting to improve market transparency and investor confidence.

- B. The act requires the establishment of resolution plans for systemically important financial institutions (SIFIs) to ensure orderly liquidation in the event of failure.
- C. The act introduces stress testing and scenario analysis to assess the risk tolerance of financial institutions.
- D. The act establishes the Consumer Financial Protection Bureau (CFPB) to enhance consumer protection.

答案:A

解析:

A 选项错误。

- 虽然核实财务报告的准确性对于提高市场透明度和投资者信心至关重要，但这并非《多德-弗兰克法案》的直接目标。实际上，这一目标更与《萨班斯-奥克斯利法案》(Sarbanes-Oxley Act) 相关。

B 选项正确，不选。

- 《多德-弗兰克法案》要求系统重要性金融机构 (SIFIs) 制定清算计划，以确保在机构失败时能够顺利清算。

C 选项正确，不选。

- 法案引入了压力测试和情景分析，以评估金融机构的风险承受能力，这是增强金融系统稳定性的主要措施。

D 选项正确，不选。

- 《多德-弗兰克法案》设立了消费者金融保护局 (CFPB)，旨在加强对消费者的保护，确保他们不受不公平产品和服务的影响。

考察: 《多德-弗兰克法案》(混淆《多德-弗兰克法案》和《萨班斯-奥克斯利法案》)

2. A junior analyst has recently joined a national banking regulator and is undergoing training for a role as a bank examiner. As part of the training, the analyst is tasked with explaining how banking regulations have evolved following the 2007-2009 financial crisis to promote improved risk governance. Which of the following statements accurately describes a regulatory change that resulted from the crisis?

- A. Banks were mandated to securitize all mortgages they originate to distribute risk across financial institutions.
- B. Banks were encouraged to create an independent risk management function with direct access to the board of directors.
- C. Proprietary trading operations were integrated with traditional banking activities to enhance governance over trading desks.
- D. Derivatives were encouraged to be traded over-the-counter (OTC) instead of being centrally cleared to improve transparency.

答案:B

解析:

A 选项错误。

- 证券化在危机中是一个关键因素，许多证券化抵押贷款的信用评级很高，但在危机中崩溃。监管并未鼓励增加证券化。

B 选项正确。

- 这是正确的。监管建议之一是银行应建立独立的风险管理职能，并直接向董事会报告。这可以防止风险管理职能被压制，确保董事会及时了解风险问题。

C 选项错误。

- 《多德-弗兰克法案》的沃尔克规则禁止银行进行自营交易，许多交易操作被要求或自愿地剥离出银行业务。

D 选项错误。

- 危机后的监管实际上鼓励尽可能进行集中清算，而不是 OTC 交易。集中清算能够提供更好的交易对手风险管理，通过清算所作为中央对手方降低系统性风险。
- OTC 交易缺乏标准化和透明度，在 2008 年金融危机中暴露出严重问题，如 AIG 的信用违约互换 (CDS) 危机就源于不透明的 OTC 交易。

考察: 金融监管 (危机后的监管鼓励集中清算而不是 OTC)

3. Basel II and Basel III are international banking regulatory standards aimed at strengthening banks’ capital adequacy and risk management. Which of the following statements accurately describes the differences between the contents of Basel II and Basel III?

- A. Basel II primarily focuses on market risk and credit risk, without requiring quantitative measures for operational risk.
- B. Basel III builds on the foundation of Basel II by adding requirements for tier 3 capital for third-party risks.
- C. Basel III is similar to Basel II but only increases the supervisory requirements for operational risk without addressing liquidity risk.
- D. Basel III builds on the foundation of Basel II, increasing requirements for liquidity risk, operational risk, and capital conservation buffers.

答案:D

解析:

A 选项错误。

- 这个选项部分正确，Basel II 确实主要关注市场风险和信用风险，但它也引入了对操作风险的监管框架。

B 选项错误。

- 这个选项不准确。Basel III 不仅增加了对第三层资本的要求，还包括对流动性风险的要求。

C 选项错误。

- 这个选项是不正确的。Basel III 不仅增加了对操作风险的监管要求，还引入了流动性风险的监管要求。

D 选项正确。

- 这个选项是正确的。Basel III 在 Basel II 的基础上，确实增加了对流动性风险、操作风险和资本缓冲的要求。

考察: 巴塞尔协议 (Basel II 与 Basel III 的比较)

4. As part of a training program for new bank examiners, a junior analyst is tasked with explaining the key features of the Basel Accords to a group of colleagues. Which of the following statements accurately describes the key features of the Basel Accords in relation to banking regulations?

- A. Basel I primarily focuses on operational risk and introduced a risk-weighted capital requirement method, setting the minimum capital at 8% of a bank’s risk-weighted assets.
- B. The standards set by the Basel Accords are legally binding for all banks in most countries.
- C. Basel III improves capital quality by limiting core Tier 1 capital to common equity and retained earnings.
- D. Basel III designed a macroprudential leverage ratio of 5% aimed at reducing systemic risk and mitigating procyclicality.

答案:C

解析:

A 选项错误。

- Basel I 主要关注的是信用风险，而非操作风险。它引入了一种风险加权的资本要求方法，设定的最低资本为风险加权资产的 8%。这意味着银行需要根据其资产的风险水平来保持相应的资本储备，以确保其在面临损失时能够承受风险。

B 选项错误。

- 虽然巴塞尔协议在全球范围内被广泛认可和采用，但它们并不是直接具有法律约束力的。巴塞尔协议是由巴塞尔银行监管委员会制定的一系列标准和指导原则，具体的法律约束力需要通过各国的国内立法来实现。因此，巴塞尔协议的实施依赖于各国监管机构的具体执行。

C 选项正确。

- Basel III 确实通过将核心一级资本限制为普通股和留存收益来提高资本质量。这一措施旨在增强银行的资本基础，使其在经济波动和金融危机中更具韧性，从而保护存款人和维护金融系统的稳定。

D 选项错误。

- Basel III 设计的宏观审慎杠杆率为 3%，而非 5%。这一杠杆率旨在降低系统性风险并减少顺周期性，确保银行在经济繁荣时期不会过度扩张，同时在经济衰退时期保持足够的资本缓冲。

考察: 巴塞尔协议的关键特征 (Basel I 主要关注的是信用风险)

5. According to the Sarbanes-Oxley Act (SOX), which of the following statements accurately reflects the legal responsibilities for the accuracy of financial reporting within a company?

- A. The Chief Risk Officer (CRO), Chief Executive Officer (CEO), and Chief Financial Officer (CFO) share joint responsibility for the accuracy of financial reporting.
- B. Only the Chief Executive Officer (CEO) is responsible for the accuracy of financial reporting.
- C. Only the Chief Financial Officer (CFO) is solely responsible for the accuracy of financial reporting.
- D. The Chief Executive Officer (CEO) and Chief Risk Officer (CRO) jointly share responsibility for the accuracy of financial reporting.

答案:D

解析:

D 选项正确。

- 根据 SOX 法案第 302 条，首席执行官（CEO）和首席财务官（CFO）必须证明公司财务报告的准确性和完整性，并对任何故意不当行为承担法律责任。

考察: 公司治理 (SOX 法案的责任分配)

6. As part of a regulatory compliance training session for bank risk managers, the facilitator discusses the implementation of stress testing frameworks under the Dodd-Frank Act. Which of the following statements MOST ACCURATELY describes the characteristics of regulatory stress testing?

- A. Stress testing methodology follows a top-down approach, where individual bank performance metrics are aggregated to assess systemic impacts.
- B. Stress testing primarily focuses on credit risk assessment, as it represents the most significant risk factor in banking operations.
- C. Stress testing frameworks operate under static risk assumptions and maintain fixed portfolio allocations throughout the testing period.
- D. Stress testing encompasses both idiosyncratic bank-level risks and broader systemic risks across financial institutions.

答案:D

解析:

A 选项错误。

- 压力测试实际上采用自下而上的方法，从宏观经济情景出发，分析这些情景对各个银行的具体影响，然后再综合评估整体影响。这种方法能够更好地捕捉到不同银行在面对相同压力情景时的差异化表现。

B 选项错误。

- 压力测试是一个全面的风险评估框架，涵盖多个风险维度：
 - 信用风险：评估借款人违约风险

- 市场风险：分析市场价格波动影响
- 流动性风险：测试在压力情景下的资金流动性
- 操作风险：评估极端情况下的运营能力

C 选项错误。

- 压力测试并不是假设风险因素静态的。实际上，它允许动态管理投资组合，以应对不断变化的市场条件。现代压力测试框架采用动态方法，考虑到风险因素的时变特性、管理层的主动响应措施、投资组合的动态调整、市场环境的持续变化。

D 选项正确。

- 全面的压力测试框架同时关注：
 - 个体银行层面：评估单个机构的脆弱性
 - 系统性风险：分析金融体系的互联性
 - 传染效应：评估风险在机构间的传播
 - 宏观审慎视角：关注整体金融稳定性

考察：多德-弗兰克法案内容（压力测试需要同时考虑个体和系统性风险）

7. As part of a regulatory compliance training session for bank risk managers, the facilitator discusses the requirements set forth by the Federal Reserve Board (FRB) regarding stress testing. Which of the following statements is CORRECT in relation to the Dodd-Frank Act Stress Test (DFAST) and the Comprehensive Capital Analysis and Review (CCAR)?

- A. The Dodd-Frank Act Stress Test (DFAST) is applicable to banks with assets exceeding \$50 billion, while CCAR applies to those exceeding \$250 billion.
- B. Under the CCAR framework, banks are required to submit capital plans in a standardized format without customization to ensure uniformity in regulatory reporting.
- C. CCAR requires banks to maintain a minimum Tier 1 capital ratio of 4.5% during the planning horizon.
- D. The CCAR and DFAST frameworks use different stress scenarios and methodologies to ensure comprehensive risk assessment.

答案:C

解析：

A 选项错误。

- 这个门槛值是不准确的。实际上，DFAST 适用于资产超过 100 亿美元的银行，而 CCAR 适用于资产超过 500 亿美元的银行。这种分层监管确保了监管要求与银行规模相匹配。

B 选项错误。

- 这种说法是不准确的。在 CCAR 框架下，银行提交的资本计划可以根据各家银行的具体情况和特点进行定制，而不是必须遵循统一的格式。这种灵活性使得银行能够更好地反映其独特的业务模式和风险特征。

C 选项正确。

- CCAR 确实要求银行在计划期间内保持至少 4.5% 的一级资本比率。这一要求旨在确保银行在面临经济压力时能够维持充足的资本水平，从而保持稳健的财务状况。

D 选项错误。

- 这种说法是不准确的。CCAR 和 DFAST 实际上使用相同的压力情景和方法论，这样可以确保评估结果的一致性和可比性。两个框架的主要区别在于适用范围和具体要求，而不是评估方法。

考察：CCAR 框架下监管合规（CCAR 要求银行在计划期间内保持至少 4.5% 的一级资本比率）

8. During a regulatory policy review meeting, a senior risk manager is discussing the European response to the global financial crisis through enhanced supervisory frameworks. Which of the following statements MOST ACCURATELY describes the core elements of the European stress testing approach in response to the crisis?

- A. The Supervisory Review and Evaluation Process (SREP) framework allows banks to operate under individualized standards tailored to their specific risk profiles and business models.
- B. The Internal Capital Adequacy Assessment Process (ICAAP) primarily emphasizes asset liquidity assessment and increased funding costs during stress periods.
- C. The European Banking Authority (EBA) stress testing methodology adopts a static approach, which differs from the dynamic approach used in the Comprehensive Capital Analysis and Review (CCAR).
- D. The Internal Liquidity Adequacy Assessment Process (ILAAP) focuses predominantly on scenario analysis and stress testing to support capital planning initiatives.

答案:C

解析:

A 选项错误。

- SREP 框架引入了三个核心监管原则：
 - 评估银行商业模式在压力条件下的可持续性
 - 采用基于行业最佳实践的评估方法
 - 要求所有银行最终达到统一的监管标准
- 因此，SREP 并不允许银行采用个性化标准，而是强调监管标准的一致性。

B 选项错误。

- ICAAP 的主要职责是评估资本充足性，包括情景分析和压力测试，资产流动性和压力期间融资成本的评估属于 ILAAP 的范畴，这体现了监管框架中资本充足性和流动性风险评估的明确分工。

C 选项正确。

- EBA 对资产规模超过 300 亿欧元的银行实施压力测试，EBA 采用静态资产负债表方法进行压力测试，这与 CCAR 的动态方法形成鲜明对比。

D 选项错误。

- ICAAP 包括情景分析和压力测试。它概述了压力测试如何支持资本规划。ILAAP 考虑了在压力时期资产清算和融资成本增加的潜在损失。

考察: 欧洲银行监管（EBA 压力测试采用静态方法，这与 CCAR 的动态方法不同）

6 考点 6：Best Practice of Corporate Governance

1. As part of a corporate governance review, the board of directors at a major bank is assessing various factors that influence their governance framework. In this context, which of the following is not considered a primary concern of corporate governance in banks?

- A. Ensuring competitive positioning of the bank in each market to maximize profitability and market share.
- B. Determining the risk appetite of the bank to align with its strategic objectives and risk management practices.
- C. Establishing the composition of the board of directors to ensure diverse expertise and effective oversight.
- D. Setting the compensation policy for executives to align their incentives with the long-term goals of the bank.

答案:A

解析:

A 选项正确。

- 确保银行在各个市场的竞争定位主要属于商业战略的范畴，而非公司治理的核心关注点。虽然竞争定位对银行的成功至关重要，但它更侧重于市场策略而非治理结构。
- 公司治理关注的是对商业实体运营的适当控制，而不是战略的具体细节。

B 选项错误。

- 确定风险偏好是公司治理的重要组成部分，确保银行在追求利润的同时能够有效管理风险。这有助于维护银行的长期稳定性。

C 选项错误。

- 董事会的组成直接影响公司的治理结构和决策过程，因此是公司治理的关键关注点。多样化的董事会能够提供更全面的视角和监督。

D 选项错误。

- 高管的薪酬政策是公司治理的重要方面，涉及到激励机制和公司绩效的关系。合理的薪酬政策能够激励高管为股东创造价值。

考察: 公司治理 (公司治理关注的是对商业实体运营的适当控制，而不是战略的具体细节。)

2. During a risk management workshop, participants are discussing the various components of effective risk governance. Which of the following activities is not typically included in the framework of risk governance?

- A. Setting limits on risk exposures to ensure that the organization does not take on excessive risk.
- B. Establishing the infrastructure for risk management information flows to facilitate timely decision-making.
- C. Allowing for transparency of risk procedures to enhance accountability and trust within the organization.
- D. Setting methodologies to assess credit risk to evaluate the potential for borrower default.

答案:D

解析:

A 选项错误。

- 设置风险敞口的限制是风险治理的重要组成部分，旨在防止过度风险暴露，确保组织的财务稳定性。

B 选项错误。

- 建立风险管理信息流的基础设施是有效风险治理的关键，确保信息能够及时传递给决策者。

C 选项错误。

- 允许风险程序的透明性有助于增强组织内部的问责制和信任，这是良好治理的基本原则。

D 选项正确。

- 设置评估信用风险的方法论通常属于风险管理的具体实施，而非风险治理的框架。风险治理更关注的是整体风险管理策略和流程的建立。

考察: 风险管理框架 (风险管理框架关注的是风险管理策略和流程的建立，而不是具体的评估方法)

3. A compliance officer at a large investment bank is conducting a training session for new employees on the key responsibilities of the chief risk officer (CRO) within the organization. Which of the following statements regarding the responsibilities of the chief risk officer (CRO) is least accurate?

- A. The CRO is typically a member of the risk committee, responsible for designing the company's risk management framework.
- B. The CRO generally has a direct reporting line to the CEO but does not have a dotted line to the board of directors.
- C. The CRO is empowered by the senior risk committee to make daily operational decisions.

D. The CRO has a voice in approving new financial instruments and business initiatives despite being responsible for top-level risk management.

答案:B

解析:

A 选项正确。

- CRO 通常是风险委员会的成员，负责设计公司的风险管理框架，这是其核心职责之一。

B 选项错误。

- 虽然 CRO 通常有直接向 CEO 报告的权利，但在许多组织中，CRO 也会有一条虚线向董事会报告，以确保高层管理层对风险管理的透明度和问责制。因此，这个选项是不准确的。

C 选项正确。

- CRO 确实被赋予权力，可以由高级风险委员会授权进行日常运营决策，这使得其在风险管理中具有实际的操作能力。

D 选项正确。

- 虽然 CRO 的主要职责是管理公司的整体风险，但他们通常也参与批准新金融工具和业务计划。这是因为 CRO 需要确保这些新项目不会给公司带来过多的风险。因此，CRO 在这些决策中有发言权，以帮助公司在追求新机会的同时，保持风险在可控范围内。

考察: 对首席风险官职责的理解。（CRO 也有向董事会汇报的职责）

4. A compliance officer at a large investment bank is conducting a workshop for employees on the importance of risk appetite and strategic planning in the organization. Which of the following statements accurately reflects the responsibilities of the board and management in this context?

- A. The board determines the risk appetite, which may influence risks in other areas of the organization.
- B. Once the business planning process is complete, management should obtain approval from the risk management team.
- C. The board needs to collaborate with management to develop the company’s overall strategic plan.
- D. Management will set the company’s risk appetite, while the board will provide approval for the strategic plan related to risk appetite.

答案:A

解析:

A 选项正确。

- 董事会负责确定公司的风险偏好，这一决定将影响组织其他领域的风险管理策略。风险偏好反映了公司在追求收益时愿意承担的风险水平，因此董事会的决策对整体战略至关重要。

B 选项错误。

- 尽管管理层在业务规划过程中应与风险管理团队合作，但并不是在业务规划完成后才寻求批准。相反，风险管理团队应在整个规划过程中参与，以确保风险管理与业务目标的一致性。

C 选项错误。

- 尽管董事会在制定公司的风险偏好方面发挥重要作用，但整体战略计划的制定主要是管理层的责任。管理层负责执行和实施战略，而董事会则负责监督和批准这些战略，以确保它们与公司的风险偏好相一致。因此，C 选项的表述不准确。

D 选项错误。

- 管理层和董事会共同设定公司的风险偏好，而不是由管理层单独设定。董事会在批准与风险偏好相关的战略计划方面也扮演着重要角色。

考察: 对风险偏好和战略规划的理解。(风险偏好是董事会决定的, 而战略规划是管理层决定的)

5. A financial advisor is discussing the importance of risk management in financial institutions, focusing on the role of the chief risk officer (CRO). Which of the following statements regarding the responsibilities of the chief risk officer (CRO) is accurate?
- A. The CRO should focus on implementing tactical risk controls and not provide a vision for the organization’s risk management strategy.
 - B. The CRO should limit risk-related communications to internal management teams to maintain confidentiality.
 - C. The CRO is responsible for independently verifying that the company is executing its stated risk management practices.
 - D. The CRO may have a direct reporting line to the CEO and a dotted line to the board of directors.

答案:D

解析:

A 选项错误。

- CRO 不应仅局限于战术层面的风险控制。作为高层管理者, CRO 需要为组织的风险管理战略提供远景和方向, 确保风险管理与公司的整体目标相一致。将 CRO 的职责限制在战术层面是对这一角色重要性的误解。

B 选项错误。

- CRO 的沟通范围不应仅限于内部管理团队。CRO 需要与包括外部利益相关者和客户在内的各方进行风险相关沟通。这种广泛的沟通有助于提高透明度、建立信任, 并确保所有相关方充分了解公司的风险状况。

C 选项错误。

- 虽然 CRO 在风险管理中扮演重要角色, 但独立验证公司是否执行其声明的风险管理实践通常是审计委员会的职责。CRO 的角色更侧重于风险管理的战略制定和执行, 而不是独立审计。

D 选项正确。

- CRO 确实应该同时向 CEO 直接汇报, 并与董事会保持虚线汇报关系。这种双重汇报机制确保了 CRO 能够在公司治理中发挥关键作用, 既能及时向高管层反映风险问题, 又能保持与董事会的独立沟通渠道, 从而提高风险管理的透明度和有效性。

考察: 对首席风险官职责的理解。(独立审查是审计委员会的事)

6. A risk manager at a multinational corporation is reviewing the company’s policies on risk governance. Which of the following statements regarding corporate risk governance is correct?
- A. Management is ultimately responsible for overseeing risk.
 - B. The board of directors should promote economic performance over accounting performance.
 - C. Effective risk governance requires accountability at multiple levels.
 - D. The primary goal of risk governance is to minimize organizational risks.

答案:B

解析:

A 选项错误。

- 虽然管理层确实负责风险监督, 但有效的风险治理不仅仅依赖于管理层的监督。最终, 董事会才是负责风险治理的主体, 他们需要积极参与和指导, 以确保公司在风险管理方面的决策符合整体战略目标。

B 选项正确。

- 董事会应鼓励公司追求经济表现, 而非仅仅关注会计表现。这意味着董事会需要确保商业决策与授权的风险限额和战略业务目标一致, 从而提升组织的整体价值。

- 此外，董事会应在战略规划中发挥作用，提出相关问题，并保持专业的怀疑态度，以确保管理层的决策是经过深思熟虑的。

C 选项错误。

- 有效的风险治理确实需要问责制，但并不一定要求在多个层级上进行。
- 明确的问责制和沟通方法同样可以在较少的层级中实现。例如，一个小型公司的管理层可能只有几个人，但只要他们之间有清晰的沟通和责任划分，依然可以有效地管理风险。
- 相反，在大型企业中，层级越多，沟通可能越复杂，反而可能导致责任不清。因此，关键在于如何建立有效的沟通渠道和明确的责任，而不是单纯依赖层级的多寡。

D 选项错误。

- 风险治理的主要目标并不是单纯地最小化组织风险，而是优化和监督接受风险的方法，以增加组织的价值。风险治理应从股东和利益相关者的角度出发，考虑如何在可接受的风险范围内实现业务目标。

考察: 对风险治理的理解。（关注经济表现而不是会计表现）

7. An internal auditor at a commercial bank is assessing the risk management governance framework. They seek to identify which of the following statements is a key responsibility of the board of directors relative to risk management?

- A. Establish a corporate risk appetite framework based on market conditions and competitor analysis.
- B. Establish an audit committee chaired by the Chief Financial Officer (CFO) to oversee financial practices.
- C. Establish a risk committee that operates independently from the board and makes autonomous decisions about risk management processes.
- D. Establish a Chief Risk Officer (CRO) who reports to the CEO while maintaining direct access to the board.

答案:D

解析:

A 选项错误。

- 董事会在制定风险偏好时不能仅考虑市场条件和竞争对手分析，还需要综合评估公司内部能力、战略目标和风险承受能力。单纯基于外部因素制定风险偏好可能导致不切实际的风险管理目标。

B 选项错误。

- 虽然董事会确实需要设立审计委员会来监督财务实践，但该委员会必须独立于管理层。由首席财务官（CFO）担任委员会主席会导致利益冲突，因为 CFO 本身是管理层的一部分，这不符合最佳治理实践。

C 选项错误。

- 风险委员会不应完全独立于董事会运作。作为董事会的下设委员会，风险委员会需要定期向董事会汇报，并在董事会的指导下开展工作。允许风险委员会完全自主决策违背了公司治理的基本原则。

D 选项正确。

- 设立向 CEO 汇报同时保持与董事会直接沟通渠道的 CRO 是董事会的重要职责。这种双重汇报机制确保了风险管理的有效性和独立性，使 CRO 能够及时向最高决策层反映重要风险问题。

考察: 对风险管理治理框架的理解。（CRO 需要保持双重汇报路线）

8. A risk consultant is reviewing the governance structure of a large financial institution. During the assessment, they are examining the key responsibilities of the board of directors in risk oversight. Which of the following is a responsibility of the board of directors?

- A. Evaluate whether the company's business strategy strikes the right balance between risks and potential rewards.
- B. Evaluate whether significant transactions are in line with the principle of profit objective orientation.

C. Evaluate whether the Board has a policy that requires members to have expertise in financial analysis.

D. Evaluate whether the company has implemented a risk management system based primarily on industry benchmarks.

答案:A

解析:

A 选项正确。

- 评估公司业务战略中的风险与回报平衡是董事会的核心职责之一，这确保了公司在追求商业目标时维持适当的风险水平。
- 例如，董事会需要评估公司进入新兴市场的战略决策，权衡市场增长机会与政治风险、汇率风险等因素。

B 选项错误。

- 董事会在评估重大交易时不能仅关注短期利润目标，而应综合考虑会计准则合规性、风险影响和长期战略价值。仅关注短期利润会导致过度风险承担，违背了董事会的风险监督职责。

C 选项错误。

- 董事会不需要要求所有成员都具备财务分析专业知识。董事会成员应具有多元化的技能和经验，包括：行业经验、创新能力、战略思维、营销经验、人脉资源、领导力等。虽然董事会需要一些具备财务分析能力的成员，但不是所有成员都必须具备这项技能。

D 选项错误。

- 董事会在评估风险管理系统时不能仅依赖行业基准，而应确保系统符合公司自身的风险偏好和特点。照搬行业标准而不考虑公司具体情况是不恰当的做法。

考察: 对董事会职责的理解。(董事会需要确保风险管理与公司特点相符，而不是简单套用行业标准)

9. A compensation committee at a large corporation is reviewing various equity-based incentive plans for their senior executives. They want to ensure the compensation structure promotes prudent risk management. Which of the following securities is MOST likely to encourage excessive risk-taking behavior among executives?

- A. Deep in-the-money call options with a strike price significantly below current stock price
- B. At-the-money call options with a strike price equal to current stock price
- C. Deep out-of-the-money call options with a strike price significantly above current stock price
- D. Direct ownership of the firm’s common shares with standard holding requirements

答案:C

解析:

A 选项错误。

- 深度实值期权（执行价格远低于当前股价）已具有较大内在价值，管理层更倾向于保护这种已有价值，会采取相对保守的风险管理策略

B 选项错误。

- 平值期权（执行价格接近当前股价）对股价上下波动都敏感，这种特性促使管理层在追求收益的同时也会关注风险控制

C 选项正确。

- 深度虚值期权（执行价格远高于当前股价）会诱导管理层承担过度风险：因为只有股价大幅上涨时期权才有价值，管理层可能会为追求高回报而采取激进策略，忽视适当的风险管理

D 选项错误。

- 直接持有公司普通股使管理层的利益与股东完全一致，标准持股要求进一步确保管理层会平衡长期价值创造和风险管理

考察: 理解不同类型股权激励工具的特点及其对管理层风险管理行为的影响。(OTM 会诱导管理层承担过度风险)

10. A global investment bank is strengthening its risk governance structure following recent market turbulence. The board is considering appointing a Risk Advisory Director, a relatively new role in corporate governance. Which of the following BEST describes the primary function of this position?

- A. Ensures the accuracy and integrity of financial and regulatory reporting while monitoring adherence to regulatory requirements, legal frameworks, and risk management standards; validates that all critical functions meet or exceed industry best practices and compliance thresholds
- B. Enhances the effectiveness and efficiency of senior risk committees and audit functions, while strengthening the independence and quality of board-level risk oversight through objective assessment and strategic recommendations
- C. Conducts independent reviews of credit, market, and liquidity risk frameworks, including comprehensive evaluation of risk identification, measurement, monitoring, and control mechanisms, as well as assessment of related policies and procedures
- D. Develops and implements performance-based compensation structures for executives and staff, focusing on aligning remuneration with risk-adjusted metrics and long-term value creation

答案:B

解析:

A 选项错误。

- 确保财务和监管报告的准确性主要是财务总监和合规部门的职责，而非风险顾问董事的主要工作重点。

B 选项正确。

- 风险顾问董事的核心职责是提升董事会层面的风险监督质量和独立性，这对于现代公司治理至关重要：
 - 通过加强风险委员会和审计委员会的效能
 - 在董事会与管理层之间建立专业的沟通桥梁
 - 提供独立的行业风险专业判断
- 风险顾问董事的设立背景在于：许多非执行董事可能缺乏特定行业的专业风险知识（如银行、保险或能源行业），特别是当他们来自其他行业时。风险顾问董事作为具有深厚行业风险专业知识的角色，能够弥补这一治理缺口，加强董事会的风险监督能力。

C 选项错误。

- 具体的风险框架审查通常由风险管理部门或内部审计执行，风险顾问董事更侧重于战略层面的监督和建议。

D 选项错误。

- 薪酬结构的设计主要由薪酬委员会负责，虽然风险顾问董事可能提供建议，但这不是其核心职能。

考察: 理解风险顾问董事的战略定位。(不是执行具体的风险管理工作，而是提升董事会层面的风险治理质量)

11. A global financial institution is reviewing its organizational structure to ensure proper segregation of duties across different functions. According to the risk governance framework, which of the following is MOST likely to be the responsibility of the Finance & Operations group?

- A. Develops and implements risk policies while providing independent assessments of risk exposures to senior management
- B. Manages day-to-day business activities and ensures compliance with approved risk tolerance levels across trading desks
- C. Oversees official valuations and conducts independent verifications of pricing methodologies and processes
- D. Establishes enterprise-wide risk appetite framework and evaluates overall risk management performance

答案:C

解析:

A 选项错误。

- 风险管理部门主要负责风险政策的制定和实施、监控各类风险限额、控制模型实施过程中的风险，以及向高级管理层提供独立的风险评估报告。

B 选项错误。

- 业务部门的主要职责是在已批准的风险限额内承担和管理风险敞口，同时负责相关业务的估值验证工作。

C 选项正确。

- 财务与运营部门负责制定和管理估值与财务政策，监督包括独立验证在内的官方估值流程，管理和支持业务规划所需的分析工作，并确保交易的妥善结算、记录和文档管理。

D 选项错误。

- 高级管理层主要负责设定业务层面的风险容忍度，设计和管理相关政策，并负责评估整体业务表现。

考察: 掌握金融机构中四个关键部门的具体职责划分：高级管理层、业务线、风险管理部门、财务与运营部门。(理解记忆各自的职责)

12. A global bank is reviewing its governance structure following recent regulatory guidance on internal control frameworks. The board is discussing various aspects of the bank’s audit function. Which of the following statements about the audit function is MOST accurate?

- A. The internal audit function cannot effectively evaluate risk management activities due to the inherent complexity of modern financial institutions and markets.
- B. The operational risk management department should maintain direct reporting lines to internal audit to ensure comprehensive and independent risk oversight.
- C. Internal auditors should primarily focus on risk committee directives while maintaining responsibility for ongoing risk management supervision.
- D. The audit committee membership requires extensive financial expertise to effectively oversee accounting practices and internal control systems.

答案:D

解析:

A 选项错误。

- GARP 明确指出风险管理活动是可以进行评级的，这种评级可用于内部评估或第三方评估。内部审计具有评估风险管理有效性的能力和职责。
- 例如，评估交易部门的 VaR 限额使用率、超限频率和处理及时性，可以给出 1-5 分的评级。

B 选项错误。

- 风险管理部门应当独立于内部审计部门。这种直接报告关系会损害风险管理的独立性，违反职责分离原则。
- 审计委员会需要与底层业务活动保持独立，审计功能需独立于风险管理政策的日常实施。

C 选项错误。

- 内部审计应当向审计委员会报告而非风险委员会，正确的报告路线和职责划分：
 - 内审 → 审计委员会 → 董事会
 - 风险管理 → 首席风险官 → 风险委员会 → 董事会

D 选项正确。

- 审计委员会所有成员审计委员会必须具备足够的财务知识来履行其职责角色，这对于有效监督会计实务和内部控制系统至关重要。

考察: 理解内部审计在风险管理中的作用。(风险管理活动可以进行评级)

13. A multinational bank is restructuring its audit committee to enhance financial oversight and corporate governance. The board is discussing various proposals regarding the committee’s structure and responsibilities. Which of the following statements about the bank’s audit committee is MOST accurate?

- A. The audit committee directly participates in trading desk’s VaR limit adjustment decisions to improve the subsequent assessment of limit management framework effectiveness.
- B. The bank’s audit committee membership may include management representatives while ensuring the committee’s overall independence and professional judgment.
- C. Prior to quarterly financial report releases, the audit committee reviews derivative valuation methodologies to ensure fair value measurements of complex financial instruments maximize reported profits.
- D. Audit committee members need not all possess professional financial expertise, as this helps ensure comprehensive risk-related disclosures.

答案:B

解析:

A 选项错误。

- 审计委员会应与日常风险管理活动保持独立，不应直接参与交易部门的限额调整决策。其职责是从独立的角度评估风险管理框架的有效性，而不是参与具体业务决策。这种参与会损害委员会的独立性和客观性。

B 选项正确。

- 审计委员会虽然需要保持独立性，但并非必须完全排除管理层成员，可以包含部分管理层成员，以提供必要的业务洞见，关键是要确保整体独立性和客观性，需要与管理层保持有效沟通，及时解决发现的问题。
- 实践中的典型构成：
 - 一个大型银行的审计委员会通常由 5-7 名成员组成
 - 其中大多数（如 4-5 名）是独立董事
 - 可能包含 1-2 名具有特定专业背景的管理层成员
 - 例如，首席财务官（CFO）可以作为委员会成员，提供对复杂金融工具估值的专业见解

C 选项错误。

- 审计委员会在审查衍生品估值方法时，应关注其合理性和合规性，而不是以最大化利润为目标。委员会的职责是确保财务报告的准确性和公允性，而不是追求利润最大化。这种以利润为导向的审查方式违背了审计委员会的独立监督职责。

D 选项错误。

- 审计委员会成员必须具备足够的财务专业知识，这是确保有效履行监督职责的基本要求。缺乏专业知识将影响委员会对复杂金融交易和风险的理解和评估能力，从而降低监督的有效性。

考察: 理解审计委员会的独立性要求。(独立不代表完全排除管理层参与)

14. In a company, the board of directors plays a central role in corporate governance and risk management. Which of the following statements about the board of directors is MOST accurate?

- A. Given the board’s accountability to stakeholders, the board is ultimately responsible when risk policy is ignored or violated.
- B. The board of directors should maintain close operational collaboration with management to enhance decision-making efficiency and strategic implementation.

- C. The board’s primary role is to focus on short-term market opportunities and competitive positioning to maximize shareholder returns.
- D. The board’s effectiveness is primarily measured by the company’s quarterly financial performance and market share growth.

答案:A

解析:

A 选项正确。

- 董事会作为公司最高治理机构，对风险政策的执行负有最终责任。当风险政策被忽视或违反时，董事会需要确保及时发现并采取纠正措施，评估现有风险管理框架的有效性，加强监督机制以防止类似事件再次发生，向利益相关者提供必要的信息披露。
- 这种问责机制确保了风险管理政策能够得到有效执行，同时也体现了董事会在公司治理中的核心地位。

B 选项错误。

- 董事会需要与管理层保持适当距离，以避免代理人问题。过于密切的运营合作可能损害董事会的独立性和监督职能，影响公司治理的有效性。

C 选项错误。

- 董事会应当关注公司的长期战略发展，而不是过分关注短期市场机会。过度关注短期回报可能导致战略决策的短视，损害公司的长期竞争力和可持续发展。

D 选项错误。

- 董事会的有效性评估应该是全面的，包括公司治理、风险管理、战略执行、可持续发展等多个维度，而不能仅仅依据季度财务表现和市场份额这些短期指标。

考察: 理解董事会的全面治理职责。（董事会需要平衡各利益相关者的利益，确保公司的长期可持续发展）

15. In a large financial institution, the risk management committee is responsible for overseeing and guiding the company’s overall risk strategy. The committee’s task is to translate the board-approved risk appetite into specific operational guidelines and limits. Which statement best reflects the role of the risk management committee?

- A. Actively participate in risk assessments and implement control measures to ensure compliance.
- B. Regularly review and analyze daily value at risk to assess market risk.
- C. Design and implement scenario analyses to predict potential risk impacts.
- D. Establish clear risk limits for various business activities to guide operations.

答案:D

解析:

A 选项错误。

- 积极参与风险评估和执行控制措施通常是首席风险官及其团队的职责。风险管理委员会主要负责制定政策和战略，而不是具体的执行。

B 选项错误。

- 定期审查和分析每日在险价值是首席风险官的职责，旨在评估市场风险。这项工作需要专业的风险分析技能，通常由专门的风险管理团队完成。

C 选项错误。

- 设计和实施情景分析通常由首席风险官负责，以预测潜在的风险影响。这是为了帮助公司提前识别和应对可能的风险事件。

D 选项正确。

- 为各项商业活动设定明确的风险限制是风险管理委员会的核心职责。通过设定这些限制，委员会确保公司在可接受的风险范围内运营，并有效地将风险偏好转化为具体的操作标准。

考察: 理解风险管理委员会的角色。(为各项商业活动设定明确的风险限制)

16. A multinational bank has established clear governance structures for risk management. The board is evaluating various aspects of their risk governance framework to ensure alignment with industry best practices. Which is likely the best example of this type of effective risk governance?

- A. The CRO directly approves trading desk managers' requests to increase position limits by 20% and personally reviews their daily VaR exceptions without escalating to senior management.
- B. The Risk Committee's quarterly risk strategy updates are based primarily on analyzing the past two years' VaR breaches and historical stress test results from the 2008 financial crisis.
- C. The CRO conducts monthly risk awareness sessions with department heads to communicate board-approved risk appetite guidelines and collects structured feedback through standardized risk reporting templates.
- D. Individual trading desks can independently modify their risk appetite and adjust position limits by up to 25% based on their quarterly performance targets.

答案:C

解析:

A 选项错误。

- CRO 直接审批交易限额调整的做法存在多重问题：
 - 违反独立性原则：CRO 应当向 CEO 和风险管理委员会报告，而不是直接参与业务决策。这种做法会损害风险管理的客观性和有效性
 - 违反汇报层级：VaR 超限事件未上报高级管理层，违反了风险事件上报机制。正确的做法应该是通过既定的汇报路线：交易台 → 业务部门主管 → 高级管理层/风险委员会
 - 限额调整权限越位：20% 的限额调整幅度较大，这种重大调整应该由风险委员会审批。CRO 不应独自拥有如此重大的限额调整权限

B 选项错误。

- 风险委员会过度依赖历史数据进行风险评估是不恰当的。有效的风险治理需要结合历史经验和前瞻性分析，包括新兴风险的识别、市场环境变化的评估以及相应风险管理策略的制定。

C 选项正确。

- CRO 通过定期风险意识会议和标准化报告模板，在组织各层级之间建立了有效的双向沟通机制。这种做法不仅确保了董事会风险政策的有效传达，也有助于收集一线反馈，对建立统一的风险文化至关重要。

D 选项错误。

- 交易部门不能基于业绩目标独立调整风险偏好和限额。风险偏好的制定和调整应由董事会统一管理，以确保风险管理框架的一致性，避免各部门因追求短期利益而承担过度风险。

考察: 理解首席风险官的角色。(风险偏好的制定和批准是董事会的职责，而不是由高级管理层决定)

17. A commercial bank has recently appointed a new internal auditor to strengthen its governance structure. The auditor's first task is to review the roles and responsibilities of various board committees to ensure they align with regulatory standards. The bank, like most financial institutions, has established an audit committee, a risk committee, and a compensation committee to implement key policies. Which of the following statements about these committees is NOT correct?

- A. The audit committee is responsible for ensuring the accuracy of financial and regulatory reports and for maintaining compliance with minimum or best practice standards in key activities.

- B. Members of the audit committee must possess strong financial and legal expertise to effectively oversee the bank’s operations.
- C. The risk management committee primarily submits decision-making recommendations and reports to the board and directly engages in cross-departmental coordination.
- D. Incentive compensation should align with the long-term interests of shareholders and other stakeholders and be consistent with risk-adjusted return on capital.

答案:C

解析:

A 选项正确，不选。

- 审计委员会的职责是确保财务和监管报告的准确性。这包括审查财务报表和合规性报告，以确保它们符合相关标准和法规。这一职责对于维护银行的财务透明度和合规性至关重要。

B 选项正确，不选。

- 审计委员会成员需要具备财务和法律方面的专业知识，以便有效监督银行的运营。这种专业知识使他们能够识别潜在问题并提出改进建议，从而增强银行的治理结构。

C 选项错误。

- 风险管理委员会的主要职责是向董事会提供决策建议和报告，而不是直接参与跨部门的协调工作。其重点在于制定风险管理政策和评估风险状况，而非执行具体的协调任务。

D 选项正确，不选。

- 激励薪酬的设计应与股东和其他利益相关者的长期利益保持一致，并与风险调整后的资本回报率相一致。这种做法确保了薪酬政策支持可持续发展的公司发展，并激励管理层在风险管理中保持谨慎。

考察: 理解风险委员会和审计委员会的职责。（风险委员会负责风险管理制度的建立，审计委员会负责监督）

18. A regional bank is enhancing its corporate governance by establishing an audit committee to oversee the accuracy and integrity of its financial statements and regulatory disclosures. What is the appropriate role of the audit committee?

- A. The audit committee is responsible for defining the company’s overall risk management strategy.
- B. The audit committee ensures that the company adheres to best practice standards in financial matters.
- C. The audit committee handles the daily execution of risk management functions.
- D. The audit committee is tasked with minimizing the company’s risk exposure to the lowest possible level.

答案:B

解析:

A 选项错误。

- 风险管理策略的制定是风险委员会的职责，而不是审计委员会的任务。审计委员会主要关注财务报告的准确性和合规性。

B 选项正确。

- 审计委员会的核心职责是确保公司在财务事项上符合最佳实践标准。这包括监督财务报告流程和确保合规性，以维护财务透明度和完整性。

C 选项错误。

- 日常风险管理职能通常由首席风险官及其团队负责，而不是审计委员会的职责。审计委员会的角色是监督和评估，而非执行。

D 选项错误。

- 风险管理的目标是优化风险敞口，而不是将其降至最低。审计委员会不负责直接管理风险敞口，而是确保财务报告的准确性。

考察: 理解审计委员会的职责。(审计委员会负责确保公司在财务事项上能够尽可能符合最佳实践标准)

19. A global bank is reviewing its risk governance structure following a series of operational incidents. The bank’s management committee includes a Chief Risk Officer (CRO), while the board has appointed a Risk Advisory Director to strengthen risk oversight. After examining their respective roles and responsibilities over the past year, which of the following practices best demonstrates effective risk governance?

- A. When the exposure reaches a certain threshold (for example, 85% of the limit), the head of the business unit is forced to raise an alarm. The CRO, together with the head of the unit, then applies to the bank’s business Risk Committee for a temporary limit increase.
- B. During a significant risk event or crisis, the CRO reports directly to the CEO and urges the CEO to further report to the board.
- C. The Risk Advisory Director is responsible for providing feedback to the Board on management’s implementation of the risk management framework and acting as a bridge between the board and management in corporate governance.
- D. Risk Advisory Directors inform board members of best practices in corporate governance and risk management, but do not proactively engage with risks associated with the company’s business model.

答案:A

解析:

A 选项正确。

- 这种做法体现了有效的风险管理：设置了明确的预警阈值（85%）有助于及早发现风险；建立了清晰的上报和审批流程（业务单位 → CRO → 风险委员会）；确保了风险限额调整的合规性。

B 选项错误。

- CRO 在重大风险事件中应该直接向董事会报告，而不是通过 CEO。通过 CEO 传递会延长信息传递链条，可能导致关键信息的延迟或失真，违反了风险治理中的直接报告原则。

C 选项错误。

- 风险咨询董事的主要职责是在内部风险管理实践和外部行业标准之间搭建桥梁，提供独立的风险管理建议，而不是作为董事会和管理层之间的沟通渠道（这是 CRO 的职责）。

D 选项错误。

- 风险咨询董事不能仅关注一般性最佳实践而忽视业务模式相关风险。这种做法会导致对关键业务风险的忽视，无法提供全面和有效的风险监督。

考察: 理解首席风险官和风险咨询董事的职责。(首席风险官负责风险管理策略的制定和执行，风险咨询董事负责提供风险管理建议)

20. Following several trading losses, Global Bank is reviewing its risk governance structure. The CEO has hired a consulting firm to evaluate the roles and responsibilities of different risk management bodies. Which of the following statements accurately describes the appropriate division of risk management responsibilities?

- A. The Risk Committee of the Board of Directors is responsible for developing the company’s risk appetite and approving and updating it annually.
- B. The Chief Risk Officer is responsible for reviewing the implementation of risk management policies, methodologies and infrastructure.
- C. As a member of the Risk Committee, the Chief Risk Officer designs the risk management plan and oversees the implementation of various policies.
- D. External audits independently review the governance of significant risks to ensure the effective functioning of the risk management system.

答案:A

解析:

A 选项正确。

- 风险管理委员会作为董事会下设机构，在风险治理中处于最高层级，风险偏好的制定需要考虑股东利益，这是董事会层面的战略决策，年度审批机制确保风险偏好与市场环境和银行战略的动态匹配。

B 选项错误。

- 政策和方法论的审查是风险管理委员会的职责，而非 CRO，CRO 的主要职责是执行而非审查，确保风险管理体系的日常运作，这种职责划分体现了治理层与管理层的分离。

C 选项错误。

- CRO 虽然参与风险委员会，但不能越权决定风险政策，风险管理方案的设计应在董事会批准的风险偏好框架下进行，监督职能主要在执行层面，而非战略决策层面。

D 选项错误。

- 外部审计的职责是提供独立的第三方评估，风险治理的审查主要由风险管理委员会负责，外部审计的发现应向风险管理委员会报告，而非直接介入治理。

考察: 风险治理架构（政策和方法论的审查是风险管理委员会的职责，而非 CRO）

21. As a governance consultant for a large financial institution, you are conducting corporate governance training for board members. When discussing committee responsibilities, which of the following statements is true about the Audit Committee and the Risk Management Committee?

- A. The Risk Committee oversees financial reporting processes to ensure all disclosures are accurate and meet regulatory requirements.
- B. The Risk Committee is responsible for monitoring financial, operational, business, reputational and strategic risks.
- C. The Audit Committee ensures quality assessment of compliance, internal controls and risk processes, but not non-financial best practices.
- D. The Risk Committee reviews policy guidelines and risk management infrastructure while maintaining independence from internal and external auditors.

答案:B

解析:

A 选项错误。

- 该选项错误地将审计委员会的职责归属于风险管理委员会。监督财务报告流程和确保信息披露的准确性是审计委员会的核心职责，而非风险管理委员会。

B 选项正确。

- 风险管理委员会确实负责监控多维度的风险，包括财务风险（如市场风险、信用风险）、运营风险、业务风险、声誉风险和战略风险。这种全面的风险监控职责正是风险管理委员会的核心功能，确保了公司能够及时识别、评估和管理各类风险。

C 选项错误。

- 该选项对审计委员会职责的理解有误。审计委员会不仅要评估合规、内部控制和风险管理流程的质量，还需要确保公司在非财务事项上遵守最佳实践标准。
- 这体现了审计委员会全面的监督职责，而不是仅限于财务相关事项。

D 选项错误。

- 虽然风险管理委员会确实负责审查政策指导方针和风险管理基础设施，但该选项关于独立性的说法是错误的。

- 风险管理委员会应当与内外部审计师保持密切沟通，而不是保持独立。这种沟通有助于更好地识别和管理风险，促进董事会和管理层之间的有效沟通。

考察: 对审计委员会和风险管理委员会职责的理解。（审计委员会职责需要确保公司遵守非财务事项的最佳实践标准）

22. A newly appointed Chief Risk Officer (CRO) at a commercial bank is reviewing the bank’s risk limit framework. During the review, several business unit heads have requested changes to their risk limits. Which of the following approaches would represent the best practice in risk limit management?

- A. Design risk limits such that breaches are rare during normal business operations, while establishing clear escalation procedures for potential limit violations.
- B. Set aggressive risk limits to maximize business opportunities, with the understanding that frequent limit breaches are acceptable as long as they are properly reported.
- C. Allow individual business units to independently adjust their risk limits within a broad range to respond quickly to market opportunities.
- D. Maintain risk exposures consistently at the limit level to optimize resource utilization and maximize returns for shareholders.

答案:A

解析:

A 选项正确。

- 风险限额应在正常业务过程中很少被突破，这反映了审慎的风险管理原则，同时需要建立清晰的上报程序，以应对可能的限额突破情况，这种做法既保证了风险控制的有效性，又提供了必要的灵活性。

B 选项错误。

- 频繁的限额突破表明风险管理框架存在问题，仅仅依靠报告机制而不采取实质性管理措施是不恰当的，这种做法可能导致风险的累积和失控。

C 选项错误。

- 风险限额的调整需要经过适当的审批流程，业务部门不能独立调整风险限额，这种做法违背了风险治理的基本原则。

D 选项错误。

- 将风险敞口持续维持在限额水平是危险的做法，风险限额是上限而不是目标值，这种做法没有为意外情况预留缓冲空间。

考察: 对于风险限额的理解。（风险限额的设计应确保在正常业务过程中超出限额的概率很低。）

7 考点 7: Risk Governance Mechanism

1. A risk management team at a global investment bank is reviewing their limits framework as part of their annual risk governance process. The bank uses a two-tier limit structure to control various risk exposures. Which of the following statements about tier I and tier II limits is TRUE?

- A. Financial institutions should implement either tier I or tier II limits exclusively, as using both systems simultaneously creates operational complexity.
- B. Violations of tier I limits require immediate correction, while breaches of tier II limits can be addressed within an extended timeframe of several days.
- C. Tier II limits are more granular and typically include specific constraints such as asset class limits, stress test thresholds, and maximum drawdown parameters.
- D. Tier I limits are broader in scope and encompass general business activities and aggregate exposures across credit ratings, industries, maturities, and regions.

答案:B

解析:

A 选项错误。

- 金融机构需要同时采用两级限额体系，这是风险管理的最佳实践
- 分层架构不会增加复杂性，反而有助于实现更全面和有效的风险控制

B 选项正确。

- 一级限额 (Tier I) 违反必须立即纠正，因为这涉及机构的核心风险控制指标
- 二级限额 (Tier II) 违反允许在几天内解决，给予一定的操作灵活性

C 选项错误。

- 一级限额 (Tier I) 更具体和严格，包括资产类别总限额、压力测试限额和最大回撤限额
- 二级限额 (Tier II) 相对宽松，选项中的描述与实际情况相反

D 选项错误。

- 一级限额是具体的风险控制指标，而非宽泛的业务限制
- 二级限额才是更一般化的限制，涉及按信用评级、行业、期限和地区等维度的汇总敞口

考察: 理解金融机构两级限额体系。(Tier I 更细, Tier II 更宽)

2. A major insurance company is expanding into emerging markets and digital products. In response to these new business initiatives, the risk management committee is updating the firm’s risk appetite statement. Which of the following statements best reflects an appropriate component of a risk appetite statement?

- A. Risk appetite statements should prioritize business growth targets in emerging markets, with risk metrics adjusting dynamically to market opportunities.
- B. The risk appetite framework should emphasize quantitative and qualitative measures while establishing specific thresholds for key risk indicators across all business activities.
- C. Professional objectives should align primarily with shareholder returns, focusing on market competitiveness and profit maximization.
- D. Risk appetite measures should be reviewed annually, with flexibility to modify risk thresholds based on short-term market conditions.

答案:B

解析:

A 选项错误。

- 风险偏好声明不应过分强调业务增长目标。将风险指标与市场机会动态调整的做法可能导致风险控制的松懈，特别是在新兴市场扩张时更需要保持稳健的风险管理框架。

B 选项正确。

- 有效的风险偏好声明需要同时包含定量和定性措施，并为关键风险指标设定具体阈值。这种全面的方法能够提供清晰的风险管理指导, 确保风险可测量和可控制, 帮助机构在业务扩张过程中维持适当的风险水平.

C 选项错误。

- 风险偏好声明应当平衡各方利益相关者的需求，而不是仅关注股东回报。过分强调市场竞争力和利润最大化可能导致过度冒险，不利于公司的长期可持续发展。

D 选项错误。

- 基于短期市场条件调整风险阈值的做法违背了风险偏好声明的长期战略性质。风险阈值的调整应基于长期战略目标和风险承受能力，而不是市场波动。

考察: 风险偏好声明的核心要素。(需要平衡定量和定性指标，并为关键风险设定具体阈值)

3. A newly appointed Chief Risk Officer (CRO) at a fintech company is tasked with developing their first risk appetite statement (RAS) following several operational incidents. The board is particularly concerned about balancing growth opportunities with risk management. Which of the following statements about the development and implementation of a risk appetite statement is correct?

- A. The RAS should articulate both qualitative and quantitative measures of acceptable risk levels, while aligning with business objectives and considering input from various stakeholders across the organization.
- B. To maintain competitive advantage in the fintech industry, the RAS should be treated as confidential information and only shared with senior management and board members who directly oversee risk management.
- C. For a fintech company, the RAS should primarily focus on technological and operational risks at the business unit level, as these are the most relevant risks in the digital financial services sector.
- D. The RAS should set risk appetite levels slightly above the company's risk capacity to ensure maximum growth potential, while maintaining transparency about the relationship between risk appetite and current risk profile.

答案:A

解析:

A 选项正确。

- RAS 需要包含定性和定量两个维度的风险偏好表述，并与业务目标保持一致。定性维度描述公司愿意承担或规避的风险类型，定量维度则设定具体的风险限额和指标，这种全面的方法确保了风险管理框架的有效性。

B 选项错误。

- RAS 不应该被视为机密信息，而应该向所有相关利益相关者公开，以确保风险政策的透明度并促进风险文化的建设，这是良好公司治理的基本要求。

C 选项错误。

- RAS 应该是全面的，需要覆盖组织各个层面而不是仅限于业务单位层面，同时要考虑所有相关风险类型而不是仅限于技术和运营风险，以确保风险管理的整体性。

D 选项错误。

- 风险偏好水平不应超过公司的风险承受能力，这可能危及公司的可持续发展。正确的做法是将风险偏好设定在风险承受能力以下，留出足够的安全边际，在风险与收益之间取得平衡。

考察: 风险偏好陈述书的关键要素：(定性和定量表述、透明度、全面性、审慎性)

4. According to the guidelines from the Financial Stability Board (FSB) regarding Risk Appetite Statements (RAS), which of the following statements is incorrect?

- A. An effective risk appetite statement should include key background information and assumptions at the time of approving the institution's strategy and business plans.
- B. The risk appetite statement should be linked to the institution's short-term and long-term strategies, capital and financial plans, as well as compensation plans.
- C. Financial institutions must publicly disclose a summary list of their key risk policies and limits to all shareholders.
- D. The risk appetite statement does not need to include risk tolerance measures that limit the amount of risk taken at the business unit and organizational levels.

答案:D

解析:

A 选项正确。

- 根据 FSB 的指导原则，有效的风险偏好声明确实应该包含金融机构在批准战略和业务计划时的关键背景信息和假设。

B 选项正确。

- 风险偏好声明应与机构的短期和长期战略、资本和财务计划以及薪酬计划相联系，以确保风险管理与机构的整体目标和激励机制一致。

C 选项正确。

- 金融机构通常需要向所有股东公开其关键风险政策和限额的摘要列表，以提高透明度和信任度。

D 选项错误。

- 风险偏好声明需要包含限制业务单元和组织层面风险承担量的风险容忍度量。这是为了确保金融机构在各个层面上的风险承担都是可控的，并且与机构的风险偏好和资本状况相匹配。

考察: 风险偏好声明的作用与重要性（风险偏好声明需要包含限制业务单元和组织层面风险承担量的风险容忍度量。）

5. As part of a risk management workshop for new Chief Risk Officers (CROs), the facilitator discusses the critical responsibilities of the CRO in managing risk limits. Which of the following statements best describes the role of the Chief Risk Officer (CRO) in risk limit management?

- A. The CRO should focus on strategic risk limit reviews, delegating routine limit monitoring to business unit heads who have direct market insights.
- B. The CRO should prioritize business growth opportunities when considering risk limit adjustments, allowing flexible modifications based on market trends.
- C. The CRO must ensure all risk limits undergo comprehensive annual reviews with interim adjustments based on documented risk assessments.
- D. Secondary limits should be adjusted based on market conditions to improve performance.

答案:C

解析:

A 选项错误。

- CRO 不能将日常限额监控职责完全委托给业务部门主管。虽然业务部门确实具有市场洞察力，但 CRO 需要直接参与风险限额的监控，以确保风险管理的独立性和有效性。

B 选项错误。

- CRO 在考虑风险限额调整时不应优先考虑业务增长机会。风险限额的调整应基于全面的风险评估，而不是市场趋势，以确保风险管理的审慎性。

C 选项正确。

- CRO 确实需要确保所有风险限额进行年度全面审查，并根据风险评估结果进行必要的调整。这种做法体现了风险管理的系统性和持续性，同时保持了适当的灵活性。

D 选项错误。

- 虽然二级限额超标情况可能不像一级限额超标那样紧急，但它们仍然需要及时处理，因为它们可能会影响机构的风险状况。此外，市场条件的改善并不总是可以预期，因此不能依赖于市场条件的改善来纠正限额超标。

考察: 风险监控 (理解 CRO 在风险限额管理中的角色)

6. At a risk management meeting, the bank’s risk management team discussed the setting of Tier 1 and Tier 2 limits and their importance. Based on the information provided during the meeting, which of the following statements best describes the characteristics of risk limits?

- A. Tier 1 limits serve as strategic guidelines, providing flexible frameworks for business units to adapt to market conditions and opportunities.
- B. Tier 2 limits focus on granular risk controls, including specific asset class thresholds and stress testing parameters.
- C. Tier 1 limits encompass detailed operational constraints, including asset class limits and maximum drawdown thresholds.
- D. Tier 2 limits include aggregated risk exposures categorized by credit rating, industry, maturity, and region.

答案:D

解析:

A 选项错误。

- Tier 1 limits 不是灵活的战略指导方针，而是具体的、严格的风险控制指标。例如，具体的 VaR 限额、止损限额等需要严格执行的量化指标，这些限额一旦突破就需要立即采取行动。

B 选项错误。

- Tier 2 limits 实际上是较为宽泛的限额，而不是细化的风险控制。它们通常用于监控整体风险状况，例如行业集中度限额、期限错配限额等，这些限额更多地关注组合层面的风险控制。

C 选项错误。

- 虽然 Tier 1 limits 确实包含具体的限制，但将其描述为”运营约束”不准确。一级限额主要关注核心风险指标（如市场风险限额、信用风险限额），而不是日常运营细节（如交易审批流程、操作风险控制等）。

D 选项正确。

- Tier 2 limits 确实包括按信用评级、行业、期限和地区分类的汇总风险敞口。例如，单一行业敞口不超过总投资的 20%，单一信用评级占比不超过 30% 等。这种宽泛的分类方式正是二级限额的典型特征，有助于从整体角度监控风险，为一级限额提供补充。

考察: 理解 Tier 1 和 Tier 2 限额的特点。(Tier 1 更具体严格，Tier 2 更宽泛全面)
