

目录

1 考点 1:Stress testing versus VaR and ES	2
题号 1 考察: 压力测试与 VaR 在风险评估中的优势。(压力测试可以捕捉特定场景中资产类别之间的相互依赖关系)	2
题号 2 考察: 压力测试与经济资本方法的差异。(压力测试倾向于使用序数排名, 而经济资本方法使用基数概率)	3
题号 3 考察: 压力测试的时机选择 (在经济和金融环境良好时期进行压力测试的重要性)	4
题号 4 考察: 压力测试方法的比较 (回溯测试数据不适用于压力测试)	4
题号 5 考察: VaR 与压力测试的互补关系 (VaR 的局限性和压力测试的作用)	5
题号 6 考察: 压力测试的目的 (确保金融机构具备足够的资本和流动性应对极端事件)	5
2 考点 2:Key aspects of stress testing	6
题号 1 考察: 压力测试建模的关键考量 (压力测试需要考虑直接影响和二阶效应)	6
题号 2 考察: 压力测试方面。(在经济承压时期, 相关性往往会增加。)	7
题号 3 考察: 压力测试方面。(CCAR 和 DFAST 都要求银行评估其在极端情况下的生存能力)	7
3 考点 3:Governance	8
题号 1 考察: 压力测试的基本原则 (压力测试场景的严格性和全面性的重要性)	8
题号 2 考察: 内部审计在压力测试治理中的角色 (评估人员专业知识和职责分工的重要性)	9
题号 3 考察: 银行压力测试监管原则 (使用共同情景进行额外的压力测试是审慎的做法)	10
题号 4 考察: 治理架构中的压力测试。(董事会可以调整资本水平和风险敞口)	10
题号 5 考察: 巴塞尔协议 (压力测试针对的是极端风险)	11

1 考点 1:Stress testing versus VaR and ES

1. A portfolio manager at an investment firm is currently relying on a VaR-based risk measurement system to evaluate the potential losses of various investment strategies. The Chief Risk Officer (CRO) proposes implementing a stress testing approach to complement the existing VaR system. Which of the following statements best supports the CRO’s proposal?

- A. In practice, stress testing utilizes a wide range of scenarios, while VaR measures rely on a limited number of scenarios to estimate losses.
- B. Stress testing can capture the interdependencies between asset classes in specific scenarios, whereas VaR-based systems struggle to accurately reflect these relationships.
- C. When predicting the probability of losses at a given point in time, stress testing is generally more accurate than VaR-based systems.
- D. Although stress testing is similar to VaR, it is limited to using the distribution of macroeconomic variables to generate forecasts.

答案:B

解析:

A 选项错误。

- VaR 通常依赖于有限的场景来估计潜在损失，主要关注正常市场条件下的风险，而压力测试则考察更广泛的极端场景，能够更全面地评估潜在风险。

B 选项正确。

- 压力测试能够捕捉特定场景中资产类别之间的相互依赖关系，这对于理解在极端市场条件下的风险非常重要。相比之下，基于 VaR 的系统往往难以准确反映这些复杂的关系，因此 B 选项最能支持 CRO 的提议。

C 选项错误。

- 该陈述不准确地描述了 VaR 的功能。VaR 旨在预测在正常市场条件下的潜在损失，而不是本质上比压力测试更准确。压力测试的目标是评估在极端情况下的潜在损失。

D 选项错误。

- 压力测试可能涉及不严格基于概率分布的场景，且其方法不主要依赖于统计模型。压力测试的灵活性使其能够考虑历史数据中未出现的极端情况。

考察: 压力测试与 VaR 在风险评估中的优势。（压力测试可以捕捉特定场景中资产类别之间的相互依赖关系）

2. A financial consultant at a major investment firm is currently reviewing the methodologies used for assessing potential losses in client portfolios. During a strategy session, the consultant discusses the differences between stress tests and economic capital (EC) methods. Which of the following statements regarding these differences is (are) correct?

- A. Stress tests tend to analyze a longer period of time compared to EC methods.
- B. Stress tests tend to compute losses from an accounting perspective, while EC methods compute losses from a market perspective.
- C. Stress tests tend to use ordinal rank arrangements, while EC methods use cardinal probabilities.
- D. Stress tests tend to focus on conditional scenarios, while EC methods tend to focus on unconditional scenarios.

答案:C

解析:

A 选项错误。

- 压力测试通常分析的时间段较短，通常集中在特定的极端情景下，而经济资本方法往往考虑更长的时间范围，以评估长期风险。

B 选项错误。

- 压力测试一般从市场的角度计算损失，关注市场波动对资产的影响，而经济资本方法则侧重于会计视角，考虑资产负债表的整体健康状况。

C 选项正确。

- 压力测试倾向于使用序数排名，这意味着它们通常对结果进行排序，而经济资本方法则使用基数概率，提供更精确的损失估计。

D 选项错误。

- 压力测试通常关注条件场景，即在特定假设下的结果，而经济资本方法则更强调无条件场景，评估在所有可能情况下的风险。

考察: 压力测试与经济资本方法的差异。(压力测试倾向于使用序数排名，而经济资本方法使用基数概率)

3. A risk manager at a global bank is reviewing the BIS (Bank for International Settlements) guidelines on stress testing practices. The team is particularly interested in understanding when stress testing becomes especially critical for financial institutions. According to the Principles for sound stress testing practices and supervision by BIS, which of the following statements correctly identifies when stress testing is especially important?

- A. When significant regulatory changes such as Basel III or Dodd-Frank are being implemented.
- B. During periods of sustained economic growth or prolonged benign market conditions.
- C. During major organizational changes such as mergers and acquisitions, particularly when key management positions are being restructured.
- D. In the immediate aftermath of a market crisis, when traditional risk models become less reliable due to depressed market conditions.

答案:B

解析:

A 选项错误。

- 虽然新规定的实施确实需要调整压力测试框架，但这并不是压力测试特别重要的时期。压力测试应该是一个持续的过程，而不是仅在监管变化时才特别关注。

B 选项正确。

- 在经济扩张或长期市场平稳期间，压力测试特别重要，因为：
 - 市场参与者可能变得过于乐观，低估潜在风险
 - 有助于识别在良好条件下被掩盖的潜在脆弱性
 - 可以帮助机构为可能的市场转折做好准备
 - 提供前瞻性的风险评估，补充其他风险管理工具

C 选项错误。

- 虽然组织变革期间需要特别关注风险管理，但这更多是关于确保风险管理的连续性和有效性，而不是压力测试特别重要的时期。

D 选项错误。

- 市场危机后，确实需要重新评估和调整风险模型，但压力测试的重要性在危机发生前的稳定期间更为突出，因为它可以帮助机构提前识别和准备应对潜在的市场压力。

考察: 压力测试的时机选择（在经济和金融环境良好时期进行压力测试的重要性）

4. A quantitative analyst at a global asset management firm is evaluating different risk measurement approaches for their portfolio management team. The team currently uses traditional VaR and Expected Shortfall (ES) methods but is considering incorporating stress testing metrics. During a methodology review meeting, several statements are made about the characteristics of stress testing compared to traditional risk measures. Which of the following statements is correct about stress testing?

- A. Stress testing maintains consistent risk assessment parameters across all market conditions, providing standardized probability distributions for potential losses.
- B. Stress testing is inherently forward-looking as it encourages portfolio managers to consider various potential future scenarios, while traditional VaR relies primarily on historical data patterns.
- C. Stress testing results can be effectively validated through backtesting procedures, similar to how VaR models are validated using historical data.
- D. Stress VaR primarily relies on standard market conditions to generate reliable risk metrics, making it more stable than traditional VaR measurements.

答案:B

解析:

A 选项错误。

- 压力测试的参数在不同市场条件下并不保持一致，而是需要根据具体的极端情况进行调整。由于极端情况的多样性和不确定性，压力测试实际上无法提供标准化的损失概率分布。

B 选项正确。

- 压力测试具有前瞻性特征，促使管理者思考各种可能的未来情景对投资组合的影响。相比之下，传统 VaR 更依赖于历史数据模式。

C 选项错误。

- 回溯测试数据不适用于压力测试，因为压力测试模拟的是极端情况，这与常规的回溯测试方法不兼容。压力测试结果的验证需要其他方法，而不能简单地采用与 VaR 相同的回溯测试方法。

D 选项错误。

- 压力 VaR 实际上专注于特定压力时期的数据，而不是标准市场条件。这种方法正是为了捕捉极端市场条件下的风险，而不是为了获得更稳定的风险度量。

考察: 压力测试方法的比较（回溯测试数据不适用于压力测试）

5. A risk manager at a global bank is explaining to the board of directors why the bank’s risk management framework needs both VaR and stress testing. Which of the following is the MOST compelling reason for supplementing VaR measures with stress testing?

- A. VaR calculations cannot quantify the potential magnitude of losses once the confidence level threshold has been exceeded.
- B. Stress testing provides more accurate estimates of market risk than VaR during periods of significant market volatility.
- C. VaR measures tend to underestimate portfolio risks when market correlations increase during stress scenarios.
- D. Stress testing scenarios can better capture the dynamic relationships between different risk factors in the portfolio.

答案:A

解析:

A 选项正确。

- VaR 的主要局限性在于它只能显示特定置信水平下的最小损失值，但无法揭示超过这个阈值后可能发生的损失规模。压力测试通过模拟极端市场情况，可以帮助机构了解和评估尾部风险事件的潜在影响。

B 选项错误。

- 压力测试并不一定比 VaR 提供更准确的市场风险估计。两种方法各有优势，应该互相补充而不是替代。

C 选项错误。

- 虽然相关性确实会在压力情况下发生变化，但这不是使用压力测试补充 VaR 的最主要原因。VaR 模型也可以通过动态调整来部分处理相关性变化。

D 选项错误。

- 虽然压力测试可以模拟风险因子间的关系，但这不是补充 VaR 的最主要原因。最关键的是要了解超过 VaR 阈值后的潜在损失规模。

考察: VaR 与压力测试的互补关系（VaR 的局限性和压力测试的作用）

6. A risk management facilitator at a financial institution is presenting case studies on the role of stress testing in preventing financial crises. Based on these examples of institutional successes and failures, which statement best reflects the fundamental purpose of stress testing in risk management?

- A. Stress testing primarily serves to validate existing risk models by confirming their predictions under standard market conditions.
- B. Stress testing focuses on moderate market fluctuations to maintain consistent risk assessment parameters across different scenarios.
- C. Financial institutions must have sufficient liquid assets and capital to survive extreme events.
- D. Stress testing results provide precise probability estimates for future market movements based on historical patterns.

答案:C

解析:

A 选项错误。

- 压力测试的主要目的不是验证现有风险模型，而是识别在正常市场条件下可能被忽视的风险。它关注的是极端情况下的表现，而不是标准市场条件下的模型验证。

B 选项错误。

- 压力测试主要关注极端市场情况，而不是温和的市场波动。它的目的是评估机构在极端但可能发生的情景下的表现，而不是保持一致的风险评估参数。

C 选项正确。

- 这准确反映了压力测试的核心目的之一：确保金融机构在极端事件发生时具备足够的资本和流动性维持运营。这是监管机构和风险管理的基本要求。

D 选项错误。

- 压力测试不是用来提供精确的未来市场走势概率估计，而是评估极端情况下的潜在影响。历史模式可以作为参考，但不能用来精确预测未来市场走势。

考察: 压力测试的目的（确保金融机构具备足够的资本和流动性应对极端事件）

2 考点 2:Key aspects of stress testing

1. A risk modeling team at a global investment bank is developing a new stress testing framework. During the planning meeting, several approaches for scenario design and model assumptions are being discussed. Which of the following statements about stress testing modeling is CORRECT?

- A. Historical stress periods serve as reliable templates for future crisis scenarios, with past interconnections providing accurate predictions of future risk transmission patterns.
- B. Risk factor relationships during stress periods follow predictable patterns that can be effectively captured through standard correlation metrics and linear modeling approaches.
- C. The effectiveness of stress testing models depends on their ability to capture both direct impacts and second-order effects, such as counterparties' reactions and market-wide behavioral changes.
- D. Core variables and peripheral variables should be modeled with equal granularity in scenario design to ensure comprehensive risk assessment, even if this increases model complexity.

答案:C

解析:

A 选项错误。

- 过度依赖历史模式作为未来危机的模板是危险的。每次危机都有其独特的风险传导路径，例如 2008 年金融危机和 2020 年 COVID-19 大流行的传导机制就有很大差异。压力测试需要考虑新的风险关联可能性。

B 选项错误。

- 在压力时期，风险因素之间的关系往往变得不可预测且非线性。市场压力下相关性可能显著增加，并出现复杂的连锁反应。2008 年金融危机证明了简单的线性模型无法充分捕捉系统性风险的传导效应。

C 选项正确。

- 压力测试模型必须同时考虑直接影响（如资产价格变动）、市场参与者的反应（如抵押品赎回行为）以及系统性影响（如银行间借贷收紧）。这种全面的考虑能够更好地反映市场压力下的实际情况。

D 选项错误。

- 在压力测试建模中，并不需要对所有变量都采用相同的精细度。这种做法会导致模型过于复杂，降低其可操作性和实用性。
- 正确的做法是：
 - 对核心变量（如利率和 GDP）采用更精细的建模方法，因为这些变量对结果影响更大
 - 对次要变量可以采用相对简化的处理方法，以保持模型的可处理性
 - 这种分层处理方法既确保了关键风险的准确评估，又维持了模型的实用性

考察: 压力测试建模的关键考量（压力测试需要考虑直接影响和二阶效应）

2. A junior risk analyst at an asset management firm is currently participating in a strategic risk assessment meeting. As the team evaluates the effectiveness of various stress testing methodologies to enhance their risk management framework, the facilitator poses a question: Which statement is incorrect regarding the key steps in stress testing?

- A. Selecting the time frame is the first step in creating stress test scenarios, with typical periods ranging from three months to two years, depending on the institution's risk profile and objectives.
- B. Stress test scenarios can be based on historical data to predict how variables might behave in the future, providing valuable insights into potential risk exposures.
- C. During economic stress periods, it is assumed that risk factors maintain linear relationships, which simplifies the modeling process but may overlook complex interactions.

D. Various significant historical events and periods can serve as the foundation for stress test modeling, offering a realistic basis for simulating extreme conditions.

答案:C

解析:

A 选项正确。

- 选择时间范围是创建压力测试情景的第一步，常见的周期从三个月到两年不等。这个陈述是正确的，因为选择适当的时间范围有助于确定测试的焦点和目标。

B 选项正确。

- 压力测试情景可以基于历史数据来预测变量在未来的表现。这个陈述是正确的，历史数据为压力测试提供了重要的参考，帮助预测变量在未来可能的表现，尤其是在模拟过去已发生的极端事件时。

C 选项错误

- 因为在压力经济时期，风险因素之间的关系往往变得更加复杂和非线性。这意味着在经济压力下，变量之间的关系可能加强或以非预期的方式变化，而不是简单的线性关系。

D 选项正确。

- 各种重要的历史事件和时间可以作为压力测试建模的基础。这个陈述是正确的，历史事件提供了实际发生的压力情景，可以作为建模未来可能发生的极端事件的基础。

考察: 压力测试方面。（在经济承压时期，相关性往往会增加。）

3. A senior banking regulator is conducting a comprehensive review of stress testing methodologies used by major banks. The focus is on CCAR (Comprehensive Capital Analysis and Review) and DFAST (Dodd-Frank Act Stress Test) as tools for assessing banks’ resilience to extreme economic pressures. Which of the following statements is correct?

- A. CCAR tests primarily focus on evaluating banks’ historical performance metrics, with emphasis on past economic cycles to predict future resilience.
- B. Like CCAR, DFAST requires banks to submit capital plans to demonstrate their performance under stress tests.
- C. Both CCAR and DFAST require banks to assess their survival capabilities under extreme adverse scenarios to ensure the robustness of the banking system.
- D. DFAST results serve as advisory guidelines for banks’ capital management, with regulatory recommendations being optional for implementation.

答案:C

解析:

A 选项错误。

- CCAR 测试主要关注前瞻性的压力情景，包括模拟全球经济衰退等极端情况，而不是主要依赖历史表现。CCAR 要求银行在各种假设的不利情景下评估其资本充足性，这些情景可能超出历史经验范围。

B 选项错误。

- DFAST 并不要求银行提交资本计划，这与 CCAR 的要求不同。DFAST 的重点在于评估银行在压力情景下的资本充足性，而不涉及资本计划的提交。

C 选项正确。

- CCAR 和 DFAST 都要求银行在极端不利情景下评估其生存能力，以确保银行系统的稳健性。

D 选项错误。

- DFAST 测试结果具有强制执行力，如果银行未能通过测试，监管机构可以要求其采取具体措施，如限制分红和增加资本。这些要求是强制性的，而不是可选的建议。

考察: 压力测试方面。（CCAR 和 DFAST 都要求银行评估其在极端情况下的生存能力）

3 考点 3:Governance

1. A senior risk analyst at a major international bank is preparing a presentation on best practices in stress testing for the bank’s risk committee. While reviewing the BIS guidelines and industry standards, the analyst needs to identify any misconceptions about stress testing approaches. Which of the following statements about stress testing principles is INCORRECT?

- A. Reverse stress testing scenarios that could potentially lead to business failure should be seriously considered, even when the probability of such events is difficult to quantify.
- B. Stress test scenarios should be kept moderately severe to maintain credibility with shareholders, and any scenario that threatens the institution’s viability should be avoided as too extreme.
- C. Stress testing for capital and liquidity adequacy should be integrated with the institution’s annual planning process and should be updated whenever significant strategic changes are considered.
- D. Comprehensive stress testing should encompass multiple dimensions including: portfolio composition, balance sheet items, organizational levels, risk interconnections, and varying time horizons.

答案:B

解析:

A 选项正确。

- 反向压力测试是重要的风险管理工具，即使极端情况发生的概率很低，也应该认真考虑可能导致机构失败的场景。

B 选项错误。

- 压力测试场景应与董事会设定的方向和策略相关，并且应足够严厉以使内部和外部利益相关者都能信赖其有效性，而不是为了维持可信度而降低严厉程度。
- 至少某些压力测试场景应具有足以挑战机构生存能力的严重程度，这种极端情况的测试是必要的，而不是应该被避免的。

C 选项正确。

- 将压力测试与年度规划周期结合，并在重大战略决策时更新测试，这种做法确保了风险管理与业务发展的协调一致。

D 选项正确。

- 全面的压力测试应该考虑多个维度，包括资产组合、负债情况、组织各层级、风险之间的相互作用以及不同时间范围的影响。

考察: 压力测试的基本原则（压力测试场景的严格性和全面性的重要性）

2. An internal auditor at a global investment bank is reviewing the institution’s stress testing framework as part of the annual audit plan. During the review process, the audit team is discussing their role and responsibilities in stress testing governance. The team leader raises several points about the scope of their work.Which of the following statements is TRUE about the role of internal audit in stress testing governance?

- A. The audit team should independently conduct and assess each stress test scenario used by the trading desks
- B. The internal audit department serves as the "first line of defense" in the bank’s stress testing governance framework
- C. The audit team should maintain detailed knowledge of all stress-test models and methodologies used across trading desks
- D. The audit team should evaluate whether staff involved in stress-testing activities have appropriate expertise and clearly defined responsibilities

答案:D

解析:

A 选项错误。

- 内部审计的职责是评估整个压力测试框架的有效性，而不是独立评估每个具体的压力测试。内部审计不直接参与压力测试的执行和评估，而是从更高层面确保整个压力测试体系的可靠性和有效性。

B 选项错误。

- 内部审计实际上是” 第三道防线” 而不是” 第一道防线”。第一道防线是业务部门，第二道防线是风险管理部门，内部审计作为第三道防线负责独立监督和评估。

C 选项错误。

- 内部审计不需要掌握所有压力测试的具体细节。他们需要了解足够的信息来评估流程的有效性，但不需要深入了解每个测试的技术细节。这是业务部门和风险管理部门的职责。

D 选项正确。

- 内部审计的关键职责之一是评估参与压力测试活动人员的专业知识、角色和职责是否合适。这包括：
 - 确保人员具备适当的资质和经验
 - 评估职责分配是否清晰
 - 检查是否存在适当的培训机制
 - 确保关键岗位人员的独立性

考察: 内部审计在压力测试治理中的角色（评估人员专业知识和职责分工的重要性）

3. A newly appointed banking supervisor is reviewing the Basel Committee’s stress testing principles for banks. Which of the following statements about supervisory recommendations for bank stress testing is CORRECT?

- A. Bank supervisors should conduct comprehensive assessments of stress testing procedures on an annual basis, as this frequency is sufficient for identifying potential risks.
- B. Supervisors enhance stress test effectiveness through standardized evaluation metrics, focusing primarily on quantitative measures to maintain objectivity.
- C. It is appropriate for supervisors to supplement bank-specific stress tests with additional tests using common scenarios across banks within their jurisdiction.
- D. Supervisors maintain consistent capital adequacy standards across all business cycles, with predetermined thresholds for capital mobility assessments.

答案:C

解析:

A 选项错误。

- 年度评估的频率不足以有效监控银行的压力测试程序，监管机构应当更频繁地进行压力测试评估，特别是在市场环境快速变化时，需要及时调整评估频率，巴塞尔委员会建议进行更频繁的监督和评估。

B 选项错误。

- 监管机构不应仅依赖标准化的量化指标，而应结合定性和定量分析。压力测试的评估需要考虑银行的具体情况、风险偏好和业务模式，过度依赖标准化指标可能忽视银行的特殊性和潜在风险。

C 选项正确。

- 使用共同情景进行额外的压力测试是审慎的做法，这有助于比较不同银行在相同压力情景下的表现，可以识别系统性风险和跨行业风险，有利于评估整个银行体系的稳定性。

D 选项错误。

- 资本充足性标准应根据不同的经济周期和市场环境进行动态调整，而不是保持固定的标准。预设的资本流动性阈值可能无法适应市场变化，监管机构需要根据实际情况灵活评估资本充足性和流动性需求。

考察: 银行压力测试监管原则（使用共同情景进行额外的压力测试是审慎的做法）

4. At a risk management conference for a large financial institution, the Chief Risk Officer (CRO) presented a review of the governance structure to ensure effective oversight and accountability. The CRO emphasizes the important role of senior management and the board of directors in risk assessment and decision making. During the meeting, the team discussed the following statements regarding the governance structure. Which of the following statements is accurate?

- A. Senior management has ultimate oversight responsibility and accountability for the entire institution.
- B. Senior management should use scenario analysis rather than stress testing to evaluate the institution’s risk decisions.
- C. The board of directors is responsible for implementing authorized stress testing activities.
- D. The board of directors can adjust the institution’s capital levels and risk exposures based on stress test results.

答案:D

解析:

A 选项错误。

- 虽然高级管理层在监督和管理中发挥着重要作用，但最终的监督责任和问责制属于董事会。董事会负责确保机构的整体战略方向和风险管理框架的有效性。

B 选项错误。

- 高级管理层应同时利用压力测试和情景分析来全面评估风险决策。压力测试能够模拟极端市场条件下的潜在损失，而情景分析则可以帮理解不同情境下的风险表现。因此，单独使用情景分析是不够的。

C 选项错误。

- 虽然董事会负责监督和批准压力测试活动，但具体的实施工作通常由高级管理层负责。董事会的角色是确保这些活动符合机构的风险管理政策，而不是直接参与实施。

D 选项正确。

- 董事会可以根据压力测试结果采取行动，包括调整资本水平和风险敞口。这种灵活性使董事会能够在面对潜在风险时，及时做出战略调整，以确保机构的财务稳定性和运营韧性。

考察: 治理架构中的压力测试。（董事会可以调整资本水平和风险敞口）

5. During a Basel Committee meeting, a senior banking supervisor is tasked with reviewing the stress-testing principles that banks should adhere to. Which of the following statements accurately reflects a Basel Committee stress-testing principle?

- A. Stress-testing models should be reviewed at least twice per year.
- B. Stress-test results should not be communicated beyond senior management and the board.
- C. The risk captured in a stress-testing framework should be comprehensive, ranging from mild to extreme.
- D. Stress-testing framework objectives should be aligned with the overall risk management framework.

答案:D

解析:

A 选项错误。

- 巴塞尔委员会并没有规定压力测试模型必须每年至少审查两次。相反，建议根据市场环境的变化和机构的具体情况，灵活调整审查频率，以确保模型的有效性和适应性。

B 选项错误。

- 压力测试结果不仅应在高级管理层和董事会之间传达，还应在适当的情况下与其他相关方分享。这有助于确保所有利益相关者对潜在风险有全面的了解，并能采取相应的措施。

C 选项错误。

- 压力测试的目的是评估极端风险，而不是轻微风险。它旨在识别和评估在极端情况下可能对机构产生重大影响的风险，而不是关注常规市场条件下的轻微波动。

D 选项正确。

- 压力测试的目标应与机构的整体风险管理框架保持一致。这意味着压力测试应支持机构的风险管理策略，帮助识别潜在的风险敞口，并为决策提供依据，以确保机构在各种市场条件下的稳健性。

考察： 巴塞尔协议（压力测试针对的是极端风险）
